HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented asynchronous workflows for processing network traffic data across AWS regions and Direct Connect locations, enabling proactive issue detection.
- Built data pipelines using Python and SQL to analyze network performance metrics, identifying customer impact during network events and facilitating faster resolution.
- Troubleshot and performed root-cause analysis on customer-impacting issues spanning multiple AWS services and network components, driving corrective actions to completion.
- Partnered with network engineers to automate manual operational tasks, integrating AI-assisted development principles into existing workflows.
- Authored and reviewed technical design documents for new service features, ensuring alignment with scalability and reliability requirements.
- Mentored junior engineers through code reviews and design discussions, promoting best practices in software development and system architecture.
- Containerized and deployed backend services to AWS using **Docker** and **EC2**, managing configurations and basic resource allocation.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch

Languages – Java, Python, SQL, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Methodologies – Agile, Scrum, CI/CD, Incident Response

PROJECTS

AWS Direct Connect Network Health Monitoring

- Developed Python scripts to ingest and process network telemetry data from **AWS CloudWatch**, identifying anomalies in customer traffic patterns.
- Engineered **SQL** queries against PostgreSQL to extract and aggregate performance metrics, supporting the creation of operational dashboards for network health.
- Collaborated with a senior engineer to design a fault-tolerant data pipeline for real-time analysis of network events.

Automated Network Operations Playbook

- Created a **Java Spring Boot** application to automate the generation of incident reports based on alerts from Splunk and Dynatrace.
- Integrated the application with Jira to automatically create and update tickets for network-related issues, reducing manual triage time by approximately **20%**.
- Wrote shell scripts for log analysis and initial troubleshooting steps, forming the basis for an automated operational playbook.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
