HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** microservices for security automation, focusing on secure data handling and access control mechanisms.
- Developed and maintained **Python** scripts for automating threat detection onboarding processes across a large fleet of AWS accounts, reducing manual effort by approximately 40%.
- Authored comprehensive **runbooks** and **documentation** for new service features, enabling faster onboarding for junior engineers and reducing incident response time for common issues.
- Participated in the team's **on-call rotation**, triaging and resolving high-severity security incidents within strict SLAs, and implementing permanent fixes to prevent recurrence.
- Engineered **REST APIs** in Java to facilitate secure communication between internal security platforms and partner teams, ensuring seamless data enrichment and workflow orchestration.
- Contributed to code and design reviews, providing constructive feedback to peers and helping to maintain a high engineering bar for code quality and system resiliency.
- Containerized security automation services using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations and ensuring operational health.

SKILLS

Languages – Java, Python, TypeScript, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, Spring Security, scikit-learn, pandas, NumPy

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle, Linux

Concepts – Microservices, REST APIs, Object-Oriented Design, CI/CD, Incident Response, Automation, Data Enrichment, Workflow Orchestration, Security Automation

PROJECTS

AWS Security Automation Platform (HCL Technologies)

- Developed a **Python**-based service to automate the onboarding of new threat detection modules across thousands of AWS accounts, integrating with AWS IAM for secure credential management.
- Designed and implemented **REST APIs** using **FastAPI** to allow partner security teams to query status and findings from the automation platform, improving visibility and operational awareness.
- Containerized the automation services with **Docker** and deployed them to an **AWS EKS** cluster, establishing CI/CD pipelines with **Jenkins** for continuous delivery.

Security Incident Response Orchestration (HCL Technologies)

- Built a **Java Spring Boot** application to orchestrate automated remediation workflows for common security vulnerabilities, reducing manual intervention by an estimated 30%.
- Integrated with **Splunk** for real-time log analysis and alerting, triggering automated response actions based on specific security event patterns.
- Wrote detailed **runbooks** and operational guides for the incident response system, which were adopted by the client's security operations center.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
