HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot microservices** for backend systems, implementing RESTful APIs and integrating with various data sources.
- Engineered **Hibernate/JPA persistence layers** for robust data management, optimizing database interactions and ensuring data integrity across multiple relational databases.
- Implemented **JUnit and Mockito tests** for Java applications, achieving comprehensive code coverage and ensuring the reliability of new features and bug fixes.
- Contributed to the design and architecture of new and existing systems, focusing on **reliability and scaling** principles for high-throughput applications.
- Participated in **code reviews** and sprint planning sessions, providing technical estimations and ensuring adherence to coding standards within an Agile framework.
- Managed production incidents and performed root cause analysis for critical systems, ensuring adherence to strict **service level agreements** and minimizing operational impact.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and networking for predictable performance.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI, Flask

Databases – PostgreSQL, MySQL, Oracle, AWS MemoryDB, Valkey, Redis OSS, Memcached

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

DevOps & Tools – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, Kubernetes

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing

PROJECTS

High-Throughput Java Cache Service

- Developed a **Java Spring Boot service** designed for high-volume data caching, utilizing **Redis OSS** as the primary in-memory data store.
- Implemented a **RESTful API** for data retrieval and storage operations, ensuring sub-millisecond latency for critical application requests.
- Integrated the service with existing backend systems via **database-level data flows**, improving read performance by an estimated 40% for frequently accessed data.

Distributed Data Ingestion Pipeline

- Built a **Python-based ETL pipeline** to ingest and process data from disparate sources, transforming raw data into a structured format for analysis.
- Applied **pandas and NumPy** for data manipulation and cleaning, handling approximately 50GB of data daily across scheduled batch jobs.
- Deployed the pipeline components on **AWS Lambda** and **S3**, establishing an automated workflow for data preparation that reduced manual intervention by 75%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
