PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and maintained the **Session Border Controller (SBC)** service for routing calls between an internal SIP-based Call Center Platform and global telecom carriers, supporting thousands of concurrent calls.
- Developed and deployed **Python scripts** to automate routine operational tasks for telecom infrastructure monitoring, reducing manual intervention time by approximately **15%**.
- Managed incident response and performed root cause analysis for P1/P2 issues within a **24/7 production environment**, ensuring adherence to critical service level agreements.
- Implemented and troubleshot **SIP/VoIP** configurations and protocols, resolving connectivity issues between the platform and external carrier networks.
- Contributed to the expansion of telecom infrastructure into new global regions, ensuring robust and scalable call routing capabilities.
- Wrote and reviewed **Bash and Shell scripts** for systems administration tasks on Linux servers, including log analysis and scheduled job management.
- Deployed containerized applications using **Docker** on **AWS EC2** instances, managing basic configurations and resource allocation.

SKILLS

Telephony & VoIP – SIP, VoIP, Session Border Controller (SBC), Asterisk, FreeSWITCH, SER

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Linux, Bash, Shell Scripting

Programming & Scripting – Python, Java, Perl, PHP, Ruby

Site Reliability & Operations – SRE, Systems Engineering, Systems Administration, DevOps, Network Administration, 24/7 Production Environment, Incident Response, SLA Management

Networking & Protocols – TCP/IP, Networking Fundamentals, Telecommunications Industry

PROJECTS

Global Telecom Carrier Integration Platform

- Designed and implemented a scalable system for provisioning and managing connectivity with multiple global telecom carriers, supporting high-volume call traffic.
- Developed automated checks and alerts for carrier network health and call quality metrics using **Python** and **AWS CloudWatch**, identifying and flagging potential disruptions proactively.
- Configured and tested **SIP trunking** parameters and network policies to ensure secure and reliable call routing across diverse carrier environments.

Automated Telecom Infrastructure Monitoring Tool

- Built a suite of **Python scripts** to monitor key performance indicators of the telecom infrastructure, including SBC health, call success rates, and latency.
- Integrated monitoring scripts with an alerting system to notify operations teams of anomalies, reducing manual check frequency by approximately **20%**.
- Developed tooling to analyze system logs from **Linux** servers, aiding in faster diagnosis of connectivity and performance issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
