PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed day-to-day performance and reliability of assigned mechanical and electro-mechanical packaging and inspection equipment within a GMP regulated manufacturing environment.
- Performed data trend analysis on equipment performance metrics to identify and proactively address potential issues, ensuring operational continuity.
- Led technical root cause analysis and incident investigations for manufacturing equipment failures, authoring detailed reports and facilitating after-action reviews.
- Collaborated with operations teams to communicate engineering activities, investigation findings, and equipment performance status, ensuring transparency and alignment.
- Developed and maintained a structured annual maintenance schedule, coordinating with vendors and managing critical spare parts inventory to minimize manufacturing downtime.
- Supported new product and technology introductions by conducting engineering assessments, implementing system changes, and validating new equipment configurations.
- Designed and implemented automation scripts in **Python** to streamline data collection and reporting for equipment performance, reducing manual effort by **~15%**.

SKILLS

Engineering & Manufacturing – Mechanical Engineering, Electro-mechanical Systems, Automation Systems, GMP, Aseptic Manufacturing, Secondary Manufacturing, Vial Filling, Lyophilisation, Packaging, Inspection Equipment

Continuous Improvement & Problem Solving – Statistical Analysis, Continuous Improvement Methodologies, Problem Solving, Root Cause Analysis, Incident Investigation, Non-Conformance, CAPA, Preventative Maintenance, Change Control

Software & Tools – Python, SQL, Splunk, Dynatrace, Jira, Confluence, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Shell Scripting

Project Management & Planning – Technical Writing, Communication, Presentation Skills, Vendor Management, Contract Negotiation, Annual Maintenance Planning, Spare Parts Management

Data Analysis & BI – Data Trend Analysis, Power BI, DAX, Tableau, R, pandas, NumPy, Statistical Methods, Business Intelligence

PROJECTS

Automated Equipment Performance Monitoring System (HCL Technologies)

- Developed a **Python**-based automation solution to collect and analyze performance data from critical manufacturing equipment, integrating with **Splunk** for real-time monitoring.
- Created interactive **Power BI** dashboards to visualize key performance indicators (KPIs) and trends for operations and engineering teams, enabling faster identification of potential failures.
- Implemented scheduled data extraction and transformation jobs using **SQL** across PostgreSQL and Oracle databases, ensuring data integrity for reporting.

Root Cause Analysis Framework for Production Incidents (MSc Applied Project)

- Designed and documented a structured framework for conducting technical root cause analyses on production incidents, incorporating elements of change management and CAPA.
- Applied statistical analysis techniques using **R** and **pandas** to identify patterns and contributing factors in historical incident data, reducing average investigation time by **20%**.
- Developed a comprehensive set of standard operating procedures (SOPs) and best practice guidelines for incident response and reporting, enhancing team consistency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
