PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the **production performance** of packaging and inspection equipment within a **GMP regulated manufacturing** setting, monitoring day-to-day operations.
- Analyzed **data trends** across equipment performance metrics to proactively identify and manage potential issues, reducing unscheduled downtime by approximately **18%**.
- Collaborated with **operations teams** to provide timely updates on engineering activities, investigations, and loss reports, ensuring clear communication on system status.
- Developed and implemented a structured annual maintenance schedule aligned with manufacturing timelines, incorporating long-term vendor support plans and **major spare part** procurement.
- Led technical **root cause analysis** and after-action reviews for manufacturing equipment incidents, contributing to Non-Conformance and CAPA closure processes.
- Supported new product and technology introductions by conducting engineering assessments and implementing necessary system changes for successful integration runs.
- Containerized key automation scripts and data processing utilities using **Docker**, deploying them to an **AWS EC2** environment for enhanced reliability and scalability.

SKILLS

Manufacturing Equipment – Inspection Equipment, Packaging Equipment, GMP, Preventative Maintenance, Spare Parts Management, Root Cause Analysis

Data Analysis & Tools – Statistical Analysis, Data Trend Analysis, Power BI, Tableau, R, Python (pandas, NumPy)

Engineering & Automation – Mechanical Systems, Electro-mechanical Systems, Automation Systems, Process Improvement, Engineering Documentation, Standard Operating Procedures (SOPs)

Cloud & DevOps – AWS (EC2, S3, CloudWatch), Docker, CI/CD, Jenkins, Git

Software & Scripting – Java Spring Boot, Python, SQL, REST APIs, Shell Scripting

Project & Operations Management – Change Control, CAPA, Vendor Management, Contract Negotiation, SLA Management, Incident Response

PROJECTS

Automated Packaging Line Performance Monitoring

- Developed a Python-based data pipeline to ingest performance metrics from packaging line equipment, including throughput, error rates, and cycle times.
- Created interactive **Power BI dashboards** to visualize real-time equipment performance and historical trends for operations and engineering teams.
- Implemented automated alerts for critical deviations in performance, reducing the average time to detect packaging line issues by **~30%**.

Equipment Reliability Data Analysis & Improvement

- Analyzed historical maintenance logs and operational data for critical manufacturing systems using SQL and Python (pandas) to identify key failure patterns.
- Applied statistical methods to quantify the impact of different maintenance strategies on equipment uptime, informing preventative maintenance schedule adjustments.
- Designed and documented proposed improvements to the preventative maintenance program, targeting a reduction in recurring component failures by **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
