HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Supported drug product manufacturing operations within Vial and Syringe filling plants, ensuring adherence to production schedules and quality standards.
- Optimised the maintenance PMO programme by introducing **digital tools** for enhanced predictability and targeted maintenance strategies, improving equipment availability.
- Applied **business analytics** to assess equipment performance trends and identify improvement opportunities for Maintenance Reliable Execution and Condition Monitoring.
- Developed a multi-year **reliability roadmap** in collaboration with Engineering, Operations, and Quality stakeholders to enhance asset lifecycle performance.
- Analysed equipment performance data, including **downtime and failure trends**, to identify chronic issues and implement sustainable reliability improvements.
- Collaborated with system owners and technicians to define maintenance scopes and refine job plans, ensuring maintenance tasks were technically sound and risk-based.
- Contributed to a safe working environment by complying with all pertinent **environmental health/safety practice**, rules, and regulations.

SKILLS

Maintenance & Reliability – Asset reliability methodologies, RCA, FMEA, criticality analysis, PM optimisation, TPM, CMMS, EAM

Manufacturing Operations – GxP, aseptic processing, secondary manufacturing, formulation, vial filling, lyophilisation, packaging

Data Analysis & Tools – Business analytics, equipment performance data, downtime analysis, failure trends, MTBF, MTTR, digital tools

Engineering & Compliance – Plant equipment, engineering documents, standard operating procedures, EHS, regulatory compliance

Project & Process Management – Continuous improvement, Lean, Six Sigma, project management, operational excellence, system improvements

PROJECTS

Plant Equipment Reliability Improvement Initiative

- Assessed maintenance logs and performance data for critical plant equipment, identifying recurring failure modes that contributed to unplanned downtime.
- Designed and implemented enhanced preventive maintenance schedules and introduced **predictive maintenance** techniques, reducing equipment failures by **18%** over a six-month period.
- Developed standard operating procedures and technical documentation for new maintenance protocols, ensuring consistent execution across the M&R; team.

Digital Maintenance Workflow Enhancement

- Evaluated existing maintenance workflows and identified opportunities for digitisation to improve efficiency and data capture.
- Integrated **CMMS data** with business analytics tools to create dashboards visualising key reliability metrics such as MTTR and MTBF for plant assets.
- Collaborated with operations teams to refine job plans and maintenance scopes, ensuring right-first-time execution during critical shutdown periods.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
