PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed Java Spring Boot microservices for internal tooling, focusing on **REST API design** and efficient data persistence with **Hibernate**.
- Implemented asynchronous processing for high-throughput data ingestion using **Java Message Service (JMS)** and Spring Integration, processing approximately **5,000 messages per hour**.
- Designed and maintained relational database schemas and optimized complex **SQL queries** across PostgreSQL and Oracle databases for enterprise reporting, reducing query execution times by an average of **30%**.
- Collaborated with hardware engineers to define software requirements for embedded systems, translating complex technical specifications into actionable development tasks within an Agile framework.
- Contributed to the development of a **Python-based data pipeline** for ETL processes, integrating data from multiple enterprise systems and ensuring data quality through automated validation checks.
- Participated in **code reviews** and mentored junior engineers on best practices for Java development and unit testing using **JUnit**.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Languages – Java, Python, SQL, R, Bash

Frameworks & Libraries – Spring Boot, Hibernate, Spring Integration, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Jira, Confluence

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing, statistical analysis, A/B testing, time-series analysis

Operating Systems – Linux, Windows

PROJECTS

Enterprise Java Application Monitoring Dashboard

- Engineered a **Java Spring Boot** application to aggregate logs and performance metrics from production enterprise systems using **Splunk** and **Dynatrace** data.
- Developed **RESTful APIs** to expose aggregated operational data, enabling real-time dashboarding and alerting for critical system events and performance degradations.
- Implemented data persistence for historical metrics using **PostgreSQL**, facilitating trend analysis and capacity planning for infrastructure support teams.

Automated Data Reconciliation Service

- Built a **Python** service to automate the reconciliation of transaction data between two disparate financial systems, reducing manual effort by approximately **60%**.
- Designed and implemented data validation rules to identify discrepancies, utilizing **pandas** for data manipulation and analysis of large datasets.
- Integrated with core banking systems via **SQL** to extract and compare record sets, ensuring data integrity and compliance with audit requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
