PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** data pipelines on **AWS Lambda** and **S3** to process ~3,500 events/sec, replacing a legacy batch job.
- Developed **Java Spring Boot** REST APIs for cross-service communication, incorporating request validation and circuit-breaker patterns.
- Containerized **Python** and **Java** applications using **Docker** and deployed them to an **AWS EKS** cluster, managing Helm chart configurations.
- Collaborated with enterprise clients during their onboarding to gather **feature pipeline** requirements and translate them into technical specifications.
- Trained a **gradient-boosted classifier** using **scikit-learn** on a ~280k-row labelled dataset for suspicious activity detection, achieving an **AUC of ~0.86**.
- Built **Power BI dashboards** and **DAX measures** to visualise key performance indicators for business stakeholders, aiding in data-informed decision-making.
- Wrote production runbooks and technical documentation that reduced customer onboarding time from over 4 weeks to approximately 10 days.

SKILLS

Programming Languages – Python, Java, SQL, R, JavaScript, TypeScript

Frameworks & Libraries – Spring Boot, scikit-learn, pandas, NumPy, Flask, FastAPI, Node.js, React.js

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, CI/CD, Agile, Scrum

Databases – PostgreSQL, MySQL, Oracle, JSON

BI & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Data Warehousing, Statistical Analysis

AI & Machine Learning – Machine Learning Concepts, LLMs, RAG, Prompt Engineering, Model Evaluation

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Worked directly with two pilot customers to design and ship a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python CLI** to validate customer feature definitions against the platform schema before submission, catching ~70% of schema errors at write time.
- Documented common integration patterns and ran follow-up workshops with customer data teams to upskill their internal engineers.

Fraud Detection Model on Transaction Features

- Engineered a **feature pipeline** in **Python** and **SQL** to extract behavioural signals from a transaction log of roughly 1.1M records.
- Trained a **LightGBM classifier** on the resulting features, tuning class weights to handle a 1:140 fraud imbalance and reaching ~0.91 **AUC** / 0.46 **F1**.
- Packaged the model behind a **FastAPI** inference endpoint with input validation, achieving p95 latency of ~180ms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
