## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Gathered and analysed client risk exposures and claims data to prepare comprehensive reporting and identify key trends for financial lines and professional services engagements.
- Developed an analytical understanding of financial lines and cyber risks by reviewing industry reports and client-specific data, contributing to market strategy discussions.
- Assisted in preparing market submissions, renewal materials, and client deliverables by consolidating information from various internal and external sources.
- Coordinated with actuarial, finance, and compliance teams to ensure accuracy and consistency across client and market documentation.
- Supported the preparation of insurance policy renewal documentation and participated in insurer market meetings, documenting key outcomes and action items.
- Reviewed client and market materials for accuracy, consistency, and quality, flagging discrepancies for resolution to maintain high standards of client service.
- Containerised a Python-based reporting service using **Docker** and deployed it to an **AWS EC2** instance, managing CI/CD integration via **Jenkins** pipelines.

## SKILLS

**Analytics & Reporting** – Premium Reporting, Claims Analysis, Risk Assessment, Market Insight, Data Analysis

**Client & Stakeholder Management** – Client Advisory, Stakeholder Collaboration, Communication, Relationship Building, Discovery Meetings

**Documentation & Deliverables** – Market Submissions, Renewal Materials, Placement Documentation, Client Deliverables, Policy Renewals

**Industry Knowledge** – Financial Lines, Cyber Risk, Risk Capital, Insurance Broking, Professional Services

**Technical Tools** – Microsoft Excel, Microsoft PowerPoint, Microsoft Word, **Python**, **Docker**, **AWS**, **Jenkins**

## PROJECTS

### Financial Risk Analysis and Reporting Framework

- Developed a **Python** script to automate the aggregation and analysis of client-specific financial risk data, processing approximately **5,000** data points per client.
- Built a series of **Excel** and **Power BI** dashboards to visualize key risk metrics and claims trends, enabling faster identification of potential exposures for client discussions.
- Collaborated with MSc peers to define data requirements and reporting outputs, ensuring the framework met analytical needs for regulatory and business intelligence purposes.

### Client Onboarding and Documentation Tool

- Engineered a **Java Spring Boot** application with a **PostgreSQL** backend to manage client onboarding documentation, streamlining the intake process for new professional services clients.
- Designed a REST API to integrate with existing client management systems, facilitating the secure transfer of preliminary risk assessment data.
- Implemented user authentication and role-based access control to ensure data privacy and compliance with internal policies.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
