PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and shipped reusable **React** components and **TypeScript** features for customer-facing single-page applications, contributing to a shared **pnpm/Turborepo monorepo**.
- Collaborated with design and backend teams to translate wireframes into responsive UI elements and integrate with **BFF APIs**, ensuring feature parity and high-quality component implementation.
- Contributed to technical design discussions for new frontend features, focusing on performance, code quality, and maintainability within a **Next.js** application context.
- Wrote comprehensive **unit and component tests** for all developed features, ensuring code reliability and adherence to modern JavaScript, HTML, and CSS standards.
- Participated in daily **Agile/Scrum ceremonies** and code reviews, providing constructive feedback and growing skills alongside senior engineers on the team.
- Assisted in the migration of a legacy marketing website to a modern stack, enhancing user experience and maintainability through updated frontend patterns.
- Containerized frontend applications using **Docker** for consistent development and deployment pipelines, integrating with **Jenkins** for automated builds.

SKILLS

Frontend Frameworks – React, Next.js, TypeScript, JavaScript, HTML, CSS

Build Tools & Monorepos – Vite, Turborepo, pnpm

API Interaction – Backend-for-Frontend (BFF), tRPC, TanStack Query

Testing – Unit Testing, Component Testing

Cloud & CI/CD – Docker, Jenkins, AWS

Languages – Python, Java, SQL

PROJECTS

Merchant Configuration Portal (HCL Technologies)

- Developed a **React**-based single-page application interface for enterprise customers to configure transaction flows, enabling granular control over fraud prevention rules.
- Implemented **TypeScript** throughout the application, ensuring type safety and improving code maintainability for complex configuration modules.
- Integrated with backend services via REST APIs to persist customer configurations, directly impacting the platform's ability to adapt to diverse merchant needs.

Customer Onboarding Dashboard (HCL Technologies)

- Built interactive **React** components to visualize onboarding progress and key performance indicators for new financial institution clients.
- Designed and implemented data fetching logic using **TanStack Query** to provide near real-time updates on client integration status.
- Worked with stakeholders to gather requirements, ensuring the dashboard effectively communicated critical information during the client integration lifecycle.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
