PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the complete lifecycle of the **CMMS** platform for a key account, acting as primary owner for system configuration, asset registration, and maintenance planning.
- Identified and mitigated equipment reliability risks through systematic **failure analysis** and **FMEA**, reducing unscheduled facility downtime by approximately 15% across critical systems.
- Investigated recurring equipment failures, developing and coaching technicians on systematic troubleshooting methodologies and accurate **fault coding** to eliminate root causes.
- Oversaw building utilities including **HVAC, power, and water systems**, ensuring compliance with operational standards and safety regulations within a pharmaceutical manufacturing environment.
- Produced comprehensive **training materials** and conducted sessions for technicians and supervisors on CMMS usage, maintenance standards, and reliability-centered thinking.
- Improved CMMS data quality by standardising asset hierarchy, failure codes, and work types, leading to a **20% increase** in the accuracy of maintenance records and reporting.
- Designed and implemented **REST API integrations** between enterprise systems and the CMMS to automate asset registration and update maintenance schedules, improving data flow efficiency.

SKILLS

CMMS/CAFM – CMMS, CAFM, Asset Management, Maintenance Planning

Reliability Engineering – FMEA, Failure Analysis, RCA, Preventive Maintenance, Predictive Maintenance, Asset Criticality

Building Systems – HVAC, Power Systems, Water Systems, Facilities Management

Data Analysis & Reporting – Microsoft Excel, Power BI, Data Interpretation, Maintenance Data

Software & Tools – Jira, Confluence, Linux Shell Scripting, Git

Programming Languages – Python, Java

PROJECTS

CMMS Enhancement for Pharmaceutical Facilities

- Led the implementation of a new **CMMS** module for a pharmaceutical client, focusing on enhancing asset hierarchy and standardising failure codes to improve data integrity.
- Developed a Python script to automate the migration of asset data from legacy spreadsheets into the new CMMS, reducing manual entry time by approximately **40%**.
- Created detailed user guides and conducted training sessions for the site maintenance team on advanced CMMS features, including **preventive maintenance** scheduling and work order management.

Automated Maintenance Reporting System

- Built a **Power BI** dashboard to visualise key maintenance metrics, including equipment failure rates, overdue tasks, and technician workload, providing actionable insights to management.
- Developed **SQL queries** against the CMMS database to extract and transform maintenance data, ensuring data accuracy and consistency for reporting purposes.
- Integrated automated data refresh capabilities into the reporting system, providing weekly updates on asset performance and risk mitigation actions to stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
