HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained RESTful APIs using **Java Spring Boot**, handling approximately **1,500 requests per second** during peak hours for internal enterprise services.
- Implemented robust data persistence layers with **Hibernate** and PostgreSQL, ensuring transactional integrity for core application modules across multiple microservices.
- Designed and refactored object-oriented Java applications, adhering to established design patterns and achieving **over 90% JUnit test coverage** for critical business logic.
- Collaborated with a business manager to capture requirements and design new modules for enterprise systems, focusing on improving the integration of asset management and MDM services.
- Estimated and planned software development work within an Agile Scrum framework, participating actively in sprint planning, daily stand-ups, and retrospectives.
- Gained exposure to NoSQL database concepts and integration patterns as part of a cross-functional team working on a distributed asset tracking system.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing build and deployment pipelines via **Jenkins**.

SKILLS

Languages – Java, Python, Javascript, Go, Swift

Frameworks – Spring Boot, Hibernate, NestJS, FastAPI

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools & Methodologies – Git, Jenkins, Jira, Confluence, Agile, Scrum, Splunk, Dynatrace

PROJECTS

Enterprise Asset Management System (Java)

- Engineered a scalable Java Spring Boot application to manage a fleet of over **5,000 devices**, tracking their lifecycle from deployment to decommissioning.
- Developed RESTful APIs for integration with Mobile Device Management (MDM) services, enabling automated device provisioning and configuration updates.
- Implemented data models using **Hibernate** and PostgreSQL to store detailed asset information, including hardware specs, software inventory, and ownership details.

Device Fleet Orchestration Service (Python)

- Built a Python-based automation service to manage device configurations and software distribution for a fleet of macOS and iOS devices.
- Created Python scripts to parse device inventory data from CSV exports and populate an internal asset database, improving data accuracy by **~15%**.
- Designed a simple command-line interface using **FastAPI** for triggering automated software updates on registered devices.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
