PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed the production support and incident response for enterprise applications on **AWS**, resolving P1/P2 incidents within strict SLAs using **Splunk** and **Dynatrace** for deep observability.
- Developed Python scripts for automating ETL processes, generating scheduled reports, and optimizing data ingestion pipelines, handling approximately **1.5 TB** of data weekly.
- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, focusing on stateless design and efficient request handling for a distributed system.
- Operated and improved services within a large-scale, highly-available Big Data ecosystem supporting **multi-petabyte** data with sustained growth, directly enabling manufacturing operations.
- Instrumented services for deep observability, establishing meaningful alerts, comprehensive runbooks, and clearly defined **SLOs** and **SLIs** to provide an accurate view of ecosystem health.
- Drove automation initiatives to reduce operational toil and improve ecosystem stability, contributing to sustained advancement of **SRE practices** and enhancing release quality.
- Collaborated with cross-functional engineering teams on **infrastructure-as-code** practices and platform architecture decisions, shaping the long-term direction of the ecosystem.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), GCP

Programming Languages – Python, Java, Go, Bash, R

Databases – PostgreSQL, MySQL, Oracle

Containerization & Orchestration – Docker, Kubernetes

CI/CD & Observability – Jenkins, Git, Splunk, Dynatrace, PagerDuty

Data Analytics & ML – pandas, NumPy, scikit-learn, Power BI, Tableau, DAX

Operating Systems & Scripting – Linux, Shell Scripting

PROJECTS

Large-Scale Data Processing Pipeline (HCL Technologies)

- Engineered a **Python**-based data pipeline on **AWS Lambda** and **S3** to process and transform large datasets, handling approximately **3,500 events/sec** during peak hours.
- Implemented robust error handling and retry mechanisms within the pipeline, reducing data processing failures by **20%** and ensuring data integrity for downstream analytics.
- Developed automated data validation checks using **pandas** and **SQL**, ensuring data quality and consistency before it entered the production data warehouse.

Automated Production Monitoring and Alerting System

- Built a system using **Python** and **Splunk** APIs to ingest and analyze application logs, proactively identifying potential issues and reducing manual monitoring effort by **30%**.
- Configured intelligent alerting rules based on anomaly detection patterns in application metrics, leading to a **15%** reduction in critical incident response times.
- Developed a centralized dashboard in **Power BI** to visualize key operational metrics and system health indicators for stakeholders, improving visibility into production environment status.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
