PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production incident response for enterprise-level applications, reducing P1/P2 escalations by **15%** through proactive monitoring and root cause analysis using **Splunk** and **Dynatrace**.
- Developed Python scripts to automate ETL processes for scheduled financial reporting, processing approximately **50,000 records** per run and ensuring data accuracy for operational dashboards.
- Engineered and maintained **Java Spring Boot** REST APIs supporting core business functions, including implementing new endpoints for cross-system integrations and resolving complex bugs.
- Designed and implemented **Kubernetes** deployments for microservices, including writing **Helm charts** and configuring resource requests/limits to ensure stable operation within the platform.
- Participated in **code reviews** and mentored junior engineers on best practices for **Java** development and adherence to Agile methodologies.
- Troubleshot and resolved infrastructure issues impacting a high-traffic microservices ecosystem, contributing to a **20% reduction** in critical system downtime.
- Collaborated with cross-functional teams to define technical requirements and provide estimates for new feature development within a **Scrum** framework.

SKILLS

Languages – Python, Java, Bash, SQL

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Helm

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Git, Jenkins, Splunk, Dynatrace, Jira, Confluence

Methodologies – Agile, Scrum, Site Reliability Engineering

Networking – Networking Fundamentals

PROJECTS

Production System Observability Enhancement (HCL Technologies)

- Enhanced monitoring and alerting for a critical payments operations dashboard by integrating **Splunk** and **Dynatrace**, enabling faster detection of transaction processing anomalies.
- Automated log aggregation and analysis using Python scripts, reducing manual effort by **30%** and improving the speed of incident triage and root cause analysis.
- Developed **Java**-based microservices to process and enrich transaction data, ensuring reliable data flow to downstream reporting systems.

Automated Deployment Pipeline for Microservices (HCL Technologies)

- Built and maintained CI/CD pipelines using **Jenkins** and **Git** for automated build, test, and deployment of **Java Spring Boot** applications.
- Containerized applications using **Docker** and deployed them to a **Kubernetes** cluster, improving deployment consistency and enabling easier scaling.
- Implemented infrastructure-as-code principles using **Helm** charts for repeatable and manageable deployments across different environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
