HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **performance test suites** using **JMeter** across a distributed microservices ecosystem to identify and resolve latency bottlenecks.
- Analyzed application performance metrics from **Splunk** and **Dynatrace** to pinpoint root causes of slowdowns in critical enterprise systems, reducing P1 incident resolution time by 15%.
- Developed **Python scripts** to automate data extraction and analysis from performance logs, enabling quicker identification of system degradation trends for the operations dashboard.
- Collaborated with senior engineers to conduct **code reviews** for performance-critical Java Spring Boot services, ensuring adherence to best practices and identifying potential optimization areas.
- Participated in **Agile ceremonies**, providing technical estimates for performance testing tasks and contributing to sprint planning for new feature rollouts.
- Containerized performance testing agents using **Docker** for consistent execution across development and staging environments, deployed on **AWS EC2** instances.
- Profiled Java applications using built-in JVM tools and **profiling tools** to diagnose memory leaks and CPU-intensive operations, leading to targeted optimizations.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools/Monitoring – JMeter, k6, Gatling, Splunk, Dynatrace, Jira, Confluence

Web Services – REST APIs

Operating Systems – Linux

PROJECTS

Performance Analysis of Enterprise Java Application

- Developed comprehensive **performance test scenarios** in **JMeter** targeting key user workflows within a large-scale Java Spring Boot application.
- Analyzed results from load tests and production monitoring data using **Python** and **SQL** to identify critical performance bottlenecks in database queries and API response times.
- Collaborated with the development team to implement and validate performance improvements, contributing to a **20% reduction** in average API latency for core features.

Automated Performance Data Ingestion Pipeline

- Engineered a **Python**-based data pipeline to ingest and process performance logs from various sources, including **AWS CloudWatch** and application-specific logs.
- Stored processed performance data in a **PostgreSQL** database, creating schemas optimized for querying by performance analysis tools and dashboards.
- Generated automated reports on system performance trends, highlighting potential issues to stakeholders and enabling proactive capacity planning.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
