PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored the health and performance of a high-traffic microservices ecosystem using **Splunk** and **CloudWatch**, responding to alerts and managing P1/P2 incidents to maintain service availability for internal teams.
- Developed **Python** scripts to automate data ingestion and transformation for operational reporting, processing approximately 15,000 records daily into a data warehouse.
- Investigated production issues within a complex platform, contributing to root cause analysis and implementing fixes that reduced recurring incidents by **18%**.
- Built and improved **dashboards** and **alerting** configurations in **Grafana** to provide real-time visibility into system health and performance trends.
- Automated operational tasks by writing **Bash** and **Python** scripts, reducing manual intervention in deployment and configuration management processes by an estimated **20%**.
- Collaborated with a distributed team to define and improve operational best practices, including participation in an on-call rotation with mentorship from senior engineers.
- Gained exposure to **Kubernetes** and container orchestration, assisting in the deployment and management of microservices within a cloud-native environment.

SKILLS

Languages – Python, Bash, Java, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker

Monitoring & Observability – Splunk, Grafana, Dynatrace

Databases – PostgreSQL, MySQL, Oracle

Development Tools & Practices – Git, Jenkins, Jira, Confluence, Agile/Scrum

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R

PROJECTS

Production Monitoring and Alerting System (HCL Technologies)

- Developed real-time monitoring dashboards using **Splunk** and **Grafana** to track key performance indicators for enterprise Java applications, enabling proactive identification of potential issues.
- Automated the generation of daily operational reports with **Python** and **SQL**, consolidating data from multiple sources and reducing manual reporting time by approximately **40%**.
- Implemented alert configurations that reduced critical incident response times by an average of **25%** through timely notifications and detailed diagnostic information.

Automated Data Pipeline for Operational Insights (MSc Applied Project)

- Designed and implemented an ETL pipeline using **Python** (pandas, NumPy) and **SQL** to ingest and process data from disparate sources into a centralized PostgreSQL data warehouse.
- Created interactive **Power BI** dashboards to visualize key operational metrics and trends, facilitating data-driven decision-making for business stakeholders.
- Applied statistical analysis techniques in **R** to identify patterns and anomalies within the processed data, contributing to a deeper understanding of system behavior.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
