HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **C#/.NET** microservices for investment portfolio management, processing approximately **1,500** concurrent user requests during peak trading hours.
- Developed **SQL** queries and stored procedures for a financial data aggregation platform, improving data retrieval performance for reporting functions by **22%**.
- Authored **Python** scripts to automate ETL processes for trade reconciliation data, reducing manual processing time by **15 hours** per week.
- Contributed to the design and architecture of a new **.NET Core** trading system, focusing on scalability and low-latency data handling.
- Championed **code quality** through comprehensive unit testing (NUnit) and participation in rigorous code reviews for enterprise-grade applications.
- Integrated new financial data feeds into existing **.NET** applications, ensuring data integrity and adherence to strict regulatory reporting standards.
- Deployed and managed containerized **.NET** applications on **AWS EKS**, configuring Kubernetes deployments and monitoring resource utilization.

SKILLS

Languages – C#, .NET, SQL, Python, Java

Frameworks/Libraries – .NET Core, Spring Boot, NUnit, Pandas, NumPy

Databases – PostgreSQL, MySQL, Oracle, SQL Server

Cloud/DevOps – AWS (EC2, S3, Lambda, EKS), Docker, Kubernetes, Jenkins, Git

Tools/Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

Investment Data Processing Engine (HCL Technologies)

- Developed a **.NET Core** application to ingest and process high-volume financial transaction data, handling over **50,000** records daily.
- Implemented robust error handling and logging mechanisms using **Splunk**, reducing critical incident resolution time by **30%**.
- Designed and built RESTful APIs with **C#** to expose processed data to downstream reporting systems and internal dashboards.

Python-Based Trade Reconciliation Automation (HCL Technologies)

- Created a **Python**-based ETL pipeline to automate the reconciliation of trade data from multiple sources, ensuring data consistency across systems.
- Integrated **Pandas** and **SQLAlchemy** for efficient data manipulation and database interaction with PostgreSQL, processing datasets exceeding **1 million** rows.
- Built automated reporting modules that generated daily reconciliation summaries, which were delivered to operations teams via email.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
