PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented integration solutions for Dynamics 365 Customer Service and Field Service modules, connecting core business systems to streamline sales and customer operations.
- Developed and deployed integrations using **Power Automate** and **APIs**, facilitating data flow between disparate business applications and enhancing process automation.
- Managed system integration projects from design through to implementation, ensuring reliable data migration and connection of multiple business applications within a greenfield transformation.
- Collaborated with business analysts and stakeholders to gather requirements for system integrations, translating needs into practical technical solutions and troubleshooting integration issues.
- Contributed to the development of reusable integration components and templates, improving efficiency and consistency across multiple system connection projects.
- Wrote and executed **SQL** scripts for data validation and transformation during integration processes, ensuring data integrity between the Dynamics 365 platform and other enterprise systems.
- Containerized integration services using **Docker** and deployed them to a cloud environment, ensuring scalable and maintainable integration solutions.

SKILLS

Cloud Platforms – Dynamics 365, Power Platform, Power Apps, Power Automate, Azure

Integration & APIs – API Development, Data Migration, System Integration, REST APIs

Databases – SQL, PostgreSQL, MySQL, Oracle

Programming Languages – Java, Python, Spring Boot

Development Tools – Git, Jenkins, Docker, Jira, Confluence

Methodologies – Agile, Scrum

PROJECTS

Dynamics 365 Integration Framework

- Engineered an integration framework for Dynamics 365 using **Power Automate** and **REST APIs**, enabling seamless data exchange with key enterprise applications.
- Developed reusable connectors and workflows to automate data synchronization for sales and customer service processes, reducing manual data entry by approximately **30%**.
- Implemented robust error handling and logging mechanisms within the integration framework, improving system stability and simplifying issue resolution for connected applications.

Enterprise System Data Synchronization

- Designed and built a Python-based solution to synchronize data between an ERP system and a customer-facing portal, ensuring data consistency across platforms.
- Wrote complex **SQL** queries to extract, transform, and load data from PostgreSQL and Oracle databases, supporting approximately **1,500** daily record synchronizations.
- Automated data validation checks and reporting using Python scripts, catching over **90%** of data discrepancies before they impacted end-users.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
