HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **C++** backend services for a greenfield payment system, focusing on **low-latency** and **high-concurrency** architectures.
- Developed new features for global payment rails using **C++** and **Golang**, ensuring adherence to performance and reliability standards.
- Contributed to the design and maintenance of **REST APIs** for core payment processing, integrating with internal and external financial services.
- Wrote efficient **SQL** queries and managed relational database schemas to support backend application data requirements.
- Collaborated with cross-functional teams including software developers and client partners on project requirements and delivery.
- Participated in code reviews and technical estimations within an Agile Scrum framework to maintain code quality and project velocity.
- Containerized **C++** microservices using **Docker** and deployed them to a cloud environment, ensuring consistent application performance.

SKILLS

Languages – C++, Golang, PHP, SQL, Java, Python, R

Databases – PostgreSQL, MySQL, Oracle

Frameworks & Libraries – Spring Boot, REST APIs, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Splunk, Dynatrace

Data Analysis & BI – Power BI, Tableau, DAX, Power Query

Domain Knowledge – Payments Systems, Transaction Monitoring, ERP Integration

PROJECTS

C++ Payment Processing Engine

- Engineered a high-performance **C++** engine for processing financial transactions, designed for **multi-threaded** execution and **low-latency** responses.
- Integrated the processing engine with a **PostgreSQL** database for transaction logging and state management, developing optimized **SQL** schemas.
- Developed a **REST API** layer in **Golang** to interface with the C++ core, enabling external system interactions and monitoring.

Golang Microservice for Transaction Reconciliation

- Built a **Golang** microservice to automate reconciliation workflows between internal ledgers and external payment feeds, processing approximately **5,000** transactions daily.
- Implemented robust error handling and alerting mechanisms using **Splunk** for operational visibility and rapid issue detection.
- Designed and deployed the service using **Docker** on an **AWS EC2** instance, managed via **Jenkins** CI/CD pipelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
