HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed operational performance data from various APIs and databases to identify key areas for productivity and quality improvements, presenting findings to stakeholders.
- Developed Python scripts for automating data extraction, transformation, and loading processes from disparate business systems, reducing manual effort by an estimated **30%**.
- Modeled operational performance metrics and identified trends, enabling data-driven recommendations that supported strategic decision-making for a global team.
- Applied statistical methods and fundamental machine learning concepts to analyze datasets, supporting business decisions and identifying areas for process optimization.
- Wrote and maintained Python code for analytical tasks and automation solutions, ensuring code readability and adherence to version control practices using **Git**.
- Communicated complex analytical findings and practical recommendations clearly to both technical and non-technical colleagues through reports and presentations.
- Managed data ingestion pipelines and performed ad-hoc analysis using **SQL** across multiple relational databases, ensuring data integrity and accuracy for reporting.

SKILLS

Data Analysis – Operations Analysis, Performance Modeling, Statistical Methods, Machine Learning, Data Visualization, Problem-Solving, Communication

Programming Languages – Python, SQL, R

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Power BI, Tableau, Git, GitHub, Jenkins, Splunk, Dynatrace, AWS

Methodologies – Agile, Scrum, Data Security, Data Privacy

PROJECTS

Automated Reporting and Analysis Platform (HCL Technologies)

- Developed a suite of Python scripts to automate the generation of weekly operational performance reports, processing data from **PostgreSQL** and **MySQL** databases.
- Created interactive dashboards using **Power BI** to visualize key performance indicators derived from the automated reports, enabling faster insights for business analysts.
- Integrated the reporting scripts with **Jenkins** for scheduled execution, ensuring consistent delivery of analytical insights to stakeholders across the financial services client.

MSc Data Analytics Applied Project: Customer Churn Prediction (NCI)

- Engineered feature pipelines using **Python** (pandas, NumPy) and **SQL** to extract relevant customer data from a simulated enterprise database for churn analysis.
- Trained and evaluated a **scikit-learn** classification model to predict customer churn, achieving an **AUC of 0.78** on a held-out test set.
- Presented the model findings and actionable insights on churn drivers to academic supervisors and peers, demonstrating the application of data analytics principles.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
