HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored and triaged security alerts from various sources, identifying potential threats across **Mac**, **Linux**, and **Windows** systems, and escalating critical events to the Incident Response team.
- Developed and refined **CrowdStrike Query Language (CQL)** queries to build effective detections for threat monitoring, reducing false positives by approximately **15%** and increasing detection coverage for known attack patterns.
- Investigated and analyzed security incidents, including malware and phishing attempts, by leveraging **SIEM** and **EDR** capabilities to understand attack vectors and scope of impact.
- Performed proactive threat hunting using **SIEM** and **EDR** features, identifying suspicious activities and potential vulnerabilities before they could be exploited.
- Documented security findings and incident details comprehensively, providing actionable remediation recommendations to cross-functional teams to strengthen security controls.
- Collaborated with IT, engineering, and DevOps teams to integrate security findings into broader mitigation strategies and vulnerability management processes.
- Authored **Python** scripts to automate repetitive SOC workflows, such as log parsing and initial alert enrichment, saving an estimated **5 hours** of analyst time per week.

SKILLS

Endpoint Detection and Response (EDR) – CrowdStrike, EDR capabilities

Security Information and Event Management (SIEM) – SIEM features, Log analysis

Operating Systems – Mac, Linux, Windows

Scripting & Automation – Python, Shell scripting

Threat Intelligence – Threat intelligence feeds, OSINT tools (VirusTotal)

Incident Response – Incident response protocols, Evidence handling

PROJECTS

Security Alert Triage Automation (HCL Technologies)

- Developed a **Python** application to automate the initial triage of security alerts, parsing logs from **Splunk** and enriching them with threat intelligence data from **VirusTotal**.
- Implemented logic to categorize alerts based on severity and type, reducing manual triaging time for Tier 1 analysts by approximately **30%**.
- Integrated the automation tool with the team's ticketing system via API, creating tickets with pre-populated investigation details for confirmed or suspicious incidents.

Custom EDR Detection Rule Development (HCL Technologies)

- Wrote and tested custom detection rules using **CrowdStrike Query Language (CQL)** to identify specific threat behaviors observed within the enterprise environment.
- Focused on detecting suspicious process execution chains and anomalous network connections on **Linux** servers, a critical part of the client's infrastructure.
- Collaborated with the security operations team to tune rules, ensuring high fidelity and minimizing alert fatigue during production rollout.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
