HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Partnered with Machine Learning software teams to understand infrastructure needs and support the adoption of **DevOps practices** for their development workflows.
- Developed and maintained hybrid infrastructure automation for software engineering workflows across **Linux** and Windows environments.
- Improved continuous integration and continuous delivery workflows by implementing **containerised environments** using Docker.
- Investigated infrastructure and tooling issues, communicating findings clearly and contributing to practical solutions for the wider team.
- Deployed, monitored, and troubleshot a pool of physical devices, including **Silicon boards and mobile handsets**, for ML software testing.
- Wrote and maintained automation scripts using **Python** to streamline engineering processes and improve operational efficiency.
- Gained practical experience working with **Linux systems** and supporting engineering infrastructure, aligning with DevOps principles for reliable software delivery.

SKILLS

DevOps & CI/CD – DevOps principles, CI/CD, Jenkins, Docker, Kubernetes, Containerisation, Automation

Cloud & Infrastructure – AWS, Linux, Windows, Hybrid Infrastructure, Cloud Enablement, Physical Device Management

Scripting & Automation – Python, Bash, Shell Scripting

ML Infrastructure – Machine Learning Software Teams, ML Infrastructure, ML Software Development

Operating Systems – Linux, Windows, MacOS, Android

Collaboration & Communication – Technical Collaboration, Problem Solving, Documentation

PROJECTS

ML Workflow Automation Platform (HCL Technologies)

- Engineered automated CI/CD pipelines using **Jenkins** and **Docker** to support the build and deployment of ML software components, reducing manual intervention by approximately 40%.
- Developed Python scripts to manage and provision cloud infrastructure on **AWS** for ML development and testing environments, ensuring consistency across teams.
- Implemented container orchestration strategies with **Kubernetes** to manage deployment and scaling of ML inference services, enhancing application resilience.

Physical Device Fleet Management for ML Testing (HCL Technologies)

- Designed and implemented a system for managing and monitoring a fleet of physical devices (**Android handsets** and embedded boards) used for ML model testing.
- Created **Bash scripts** for automated device health checks, software updates, and log collection, improving the efficiency of the testing infrastructure.
- Collaborated with ML engineers to integrate device status reporting into their development workflows, providing real-time feedback on test environment availability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
