PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **Python** data pipelines on **AWS Lambda** to process and transform approximately **3,500 events per second**, replacing a less efficient batch processing system.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, focusing on building robust endpoints with comprehensive error handling.
- Designed and implemented database schemas and optimized **SQL** queries across **PostgreSQL** and **MySQL** for enhanced data retrieval performance in enterprise systems.
- Contributed to the development of machine learning software for Arm devices, gaining hands-on experience with the software development lifecycle in a global organization.
- Participated in code reviews and sprint planning sessions, collaborating with senior engineers to estimate task complexity and ensure adherence to project timelines.
- Managed and debugged issues within a large-scale Linux environment, analyzing logs from **Splunk** and **CloudWatch** to resolve P1/P2 incidents and maintain service level agreements.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and staging.

SKILLS

Languages – Python, Java, SQL, Bash, C++

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Linux, Jira, Confluence, Splunk, Dynatrace, ML Ops, Neural Networks

Analytics & ML – Machine Learning, Data Analytics, Power BI, Tableau, R, DAX

PROJECTS

ML Model Deployment Pipeline (HCL Technologies)

- Developed a **Python** pipeline to automate the extraction of features from a **~1.1M** transaction record dataset for machine learning model training.
- Trained a **LightGBM classifier** on extracted features to detect fraudulent transactions, achieving an **AUC of ~0.91** on a held-out test set.
- Packaged the trained model into a **FastAPI** inference service, ensuring a p95 latency below **180ms** for real-time scoring.

Automated System Health Monitoring (HCL Technologies)

- Created **Python** scripts to parse logs from **Splunk** and **AWS CloudWatch**, identifying critical errors and generating automated alerts for production issues.
- Built a centralized dashboard using **Flask** to visualize system health metrics and incident trends, enabling faster root cause analysis for the operations team.
- Implemented scheduled reporting jobs that summarized daily system performance and alerted stakeholders to any deviations from expected operational parameters.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
