HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot microservices** for backend systems, implementing RESTful APIs that handled approximately **1,500 requests per minute**.
- Engineered **Hibernate and JPA** persistence layers to manage complex relational data models, ensuring data integrity and efficient query execution for core application modules.
- Designed and implemented object-oriented solutions in **Java**, adhering to established design patterns and achieving over **90% JUnit test coverage** for critical business logic.
- Analyzed **building systems operational data** and user requirements to support the development of smart building strategies, contributing to digital transformation programmes.
- Assisted in the design and integration of **IoT and connected technology solutions** for commercial building projects, focusing on enhancing user experience and system efficiency.
- Collaborated with **multidisciplinary design teams** and clients to gather requirements and provide technical input for smart building initiatives.
- Containerized applications using **Docker** and managed deployments on **AWS EC2 instances**, establishing basic CI/CD pipelines with Jenkins for automated builds and testing.

SKILLS

Core Technologies – Java, Spring Boot, Hibernate, JPA, Python, SQL, Docker, Linux, Git

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, CI/CD

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query, data modelling

Smart Buildings & IoT – IoT, Connected Environments, Digital Twins, Building Performance

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java components into a modular Spring Boot architecture, improving maintainability and reducing bug resolution time by **30%**.
- Integrated a **JPA persistence layer** with PostgreSQL to manage core financial transaction data, supporting complex reporting requirements for operational teams.
- Developed RESTful APIs in Java to facilitate inter-service communication, ensuring secure data exchange and enhancing system integration capabilities across multiple platforms.

IoT Data Ingestion and Analysis Pipeline

- Designed and implemented a Python-based data pipeline to ingest and process real-time sensor data from IoT devices, handling approximately **500 data points per second**.
- Developed interactive **Power BI dashboards** to visualize building performance metrics derived from the IoT data, enabling stakeholders to identify energy efficiency opportunities.
- Applied **data analysis techniques** using pandas and NumPy to clean and transform raw sensor readings, preparing the data for further analysis and reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
