HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Led root-cause analysis for production P1/P2 incidents on **AWS compute and networking infrastructure**, reducing mean time to resolution by **18%** for assigned systems.
- Built and maintained reusable **Terraform modules** for provisioning **VPCs, subnets, and security groups** across multiple AWS accounts, improving deployment consistency by **30%**.
- Developed **Python automation scripts** to streamline the deployment of **CI/CD pipeline components** using Jenkins, cutting manual deployment time by **4 hours** per release cycle.
- Owned the validation of **disaster recovery plans** and conducted regular **backup integrity checks** for critical cloud services, ensuring adherence to defined RTO/RPO targets.
- Applied and enforced cloud security best practices, including **IAM role management** and **network segmentation**, in collaboration with security teams to maintain compliance with enterprise baselines.
- Mentored two Cloud Infrastructure Engineer I/II staff on **Terraform best practices** and **incident response procedures**, enabling them to independently manage on-call rotations within 3 months.
- Maintained and improved **runbooks and documentation** for owned systems, generating audit-ready evidence for GxP-relevant workloads and ensuring architectural adherence.

SKILLS

Cloud Platforms – AWS, Azure

Infrastructure as Code – Terraform

Scripting & Automation – Python, Bash

Containerization & Orchestration – Docker, Kubernetes

Networking – VPC, VNet, DNS, Load Balancing

Monitoring & Observability – CloudWatch, Datadog, Prometheus, Grafana, Dynatrace

CI/CD – Jenkins, Git

PROJECTS

Cloud Infrastructure Automation with Terraform

- Designed and implemented a comprehensive suite of **Terraform modules** for provisioning core AWS infrastructure, including **VPCs, EC2 instances, S3 buckets, and IAM roles**.
- Integrated Terraform modules into a **Jenkins CI/CD pipeline** to automate infrastructure deployments and updates, reducing manual configuration errors by **45%**.
- Developed detailed **runbooks and documentation** for the provisioned infrastructure, including security configurations and disaster recovery procedures, to support audit requirements.

Python-Based CI/CD Pipeline Enhancement

- Engineered **Python scripts** to automate the setup and configuration of **Jenkins pipelines** for various microservices, including build, test, and deployment stages.
- Implemented automated artifact management and versioning within the pipeline, ensuring traceability and facilitating faster rollbacks when necessary.
- Collaborated with development teams to integrate their services into the automated deployment framework, improving their release cadence by approximately **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
