PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented automated workflows for partner onboarding and data lifecycle management, processing over **5,000 partner records** annually.
- Developed **Python** ETL pipelines to synchronize partner data across multiple internal systems, reducing manual data entry by an estimated **40 hours per month**.
- Automated the migration of legacy data from spreadsheets and siloed databases into a centralized platform, handling approximately **30,000 records** during the initial phase.
- Built self-service tools enabling operations teams to perform bulk data operations, successfully reducing the need for engineering support tickets by **~15%**.
- Created automated alerting for stale data and expiring service agreements, improving data freshness and compliance for over **1,000 active partner agreements**.
- Developed **Python** scripts to auto-retrieve relevant partner contacts during network incidents, contributing to an estimated **10% reduction** in incident response time.
- Containerized automation scripts and deployed them onto **AWS EC2** instances, managing over **50 distinct automation jobs** across development and production environments.

SKILLS

Scripting & Automation – Python, Bash

APIs – REST, GraphQL

Data & Pipelines – SQL, ETL, data warehousing

Orchestration – cron, job scheduling

Data Quality – validation, deduplication, reconciliation

Cloud – AWS, EC2, S3, Lambda, CloudWatch

Tools – Jenkins, Git, Jira, Docker

PROJECTS

Partner Data Management Automation Platform

- Developed a **Python**-based automation platform to manage partner onboarding workflows, including automated data validation and initial record creation in a **PostgreSQL** database.
- Built **REST APIs** using **Flask** to expose self-service functionality for operations teams to update partner contact details and service renewal dates, handling an average of **200 requests daily**.
- Implemented automated reconciliation scripts to compare data between the new platform and legacy spreadsheets, identifying and flagging discrepancies for manual review, reducing data drift by an estimated **30%**.

Network Incident Response Contact Automation

- Engineered a **Python** service that automatically retrieves and presents relevant partner contacts and escalation paths when network incidents are logged in the internal ticketing system.
- Integrated with internal incident management tooling via API calls to trigger automated outreach workflows to key partner contacts, reducing manual lookup time during critical events.
- Developed scheduled reports tracking the usage and effectiveness of the automated contact retrieval, presenting key metrics on response time improvements to operations leadership.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
