HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for cross-service data exchange and handling approximately 500 requests per second.
- Engineered **Python scripts** for automating ETL processes, transforming and loading data from diverse sources into a data warehouse, processing ~15 GB of data nightly.
- Managed production support for enterprise applications using **Splunk and Dynatrace**, resolving P1/P2 incidents within strict SLA targets and reducing critical alert volume by 20% through root cause analysis.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing (UAT) for system configuration updates within enterprise business systems.
- Designed and implemented **SQL database schema changes** in PostgreSQL and MySQL for new feature development, ensuring data integrity and efficient querying for operational dashboards.
- Participated in **Agile Scrum ceremonies**, including sprint planning and daily stand-ups, contributing to technical estimations and defect tracking using Jira and Confluence.
- Containerised legacy Java applications using **Docker**, enabling consistent deployment environments and simplifying the CI/CD pipeline integration with Jenkins.

SKILLS

Languages – Java, Python, SQL, R, HTML, CSS, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, Flask, FastAPI, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, RStudio, Data Warehousing

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Linux Shell Scripting

PROJECTS

Enterprise Financial Operations Dashboard Enhancement

- Developed new Java Spring Boot services to process and aggregate transaction data from multiple upstream systems, improving dashboard load times by 30%.
- Created automated Python data validation scripts to identify and flag discrepancies in transaction reconciliation workflows, catching ~95% of data integrity issues before they impacted the dashboard.
- Integrated enhanced monitoring and alerting capabilities using Dynatrace, providing real-time insights into payment processing status and reducing manual checks by the operations team by 4 hours per week.

MSc Applied Data Analytics Project: Customer Churn Prediction

- Engineered a Python data pipeline using pandas and SQL to extract and clean customer interaction data from a simulated enterprise database, preparing a dataset of over 50,000 records.
- Trained a **logistic regression model** on the prepared features to predict customer churn, achieving approximately 78% accuracy on a held-out test set.
- Developed interactive **Power BI dashboards** to visualize churn drivers and model performance, presenting findings and actionable insights to academic stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
