HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for core business logic and contributing to a **15%** reduction in system response times.
- Designed and implemented database schemas and performed data validation across **PostgreSQL** and **MySQL**, ensuring data integrity for critical financial reporting workflows.
- Authored **Python** scripts to automate data extraction and transformation tasks, reducing manual effort for the operations team by approximately **10 hours** per week.
- Collaborated with cross-functional teams to gather requirements for enhancements to the enterprise business systems, directly impacting **3 distinct** operational modules.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, participating in P1/P2 response and performing root cause analysis to prevent recurrence.
- Configured and managed **Jenkins** pipelines for continuous integration and deployment, improving code deployment frequency by **~20%** and reducing build failures.
- Containerized legacy Java applications using **Docker**, enabling more consistent deployment across development and production environments.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Microservices, Hibernate, JPA, Python, Flask, FastAPI, Docker

Databases – SQL, PostgreSQL, MySQL, Oracle, Data Modelling, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn

Tools & Methodologies – Jira, Confluence, Agile, Scrum, Change Management, Incident Response, Observability

PROJECTS

Enterprise Java Application Modernization

- Refactored critical components of a legacy Java application into a microservices architecture using **Spring Boot**, enhancing modularity and maintainability.
- Implemented robust RESTful APIs for inter-service communication, ensuring seamless data exchange across distributed components and supporting a **30%** increase in transaction throughput.
- Integrated **Hibernate** for efficient data persistence layer management, improving database query performance and reducing load on the backend systems.

Python-based ETL for Operational Reporting

- Developed an automated ETL pipeline using **Python** and **pandas** to extract, transform, and load data from disparate sources into a central reporting database.
- Designed and implemented data validation checks within the pipeline to ensure data quality, catching approximately **65%** of potential data discrepancies before reporting.
- Scheduled and monitored pipeline execution using cron jobs on Linux, ensuring timely delivery of daily operational reports to business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
