PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Monitored the health and availability of the enterprise **Generative AI platform** and its deployed applications across **Azure cloud infrastructure**, responding to incidents and service requests within defined SLAs.
- Performed initial diagnostics on user-reported issues, analyzed **application logs** and **system metrics** using Splunk, identified probable causes, and resolved known issues to restore service.
- Documented user-reported issues comprehensively and maintained accurate incident, request, and problem records within **ServiceNow**, ensuring detailed tracking for root cause analysis.
- Escalated complex incidents and failures to L3, engineering, and cloud teams using the defined escalation process, coordinating closure within SLAs and providing timely updates to stakeholders on progress.
- Supported **DevOps pipelines**, automated infrastructure provisioning, and release activities for the Generative AI platform, including feature validation and configuration management in production environments.
- Created and maintained **runbooks**, playbooks, knowledge articles, and troubleshooting guides for the Generative AI platform operations team, improving knowledge sharing and incident response efficiency.
- Analyzed opportunities to reduce manual effort, improve monitoring, and strengthen platform resilience, contributing to a **15% reduction** in recurring production incidents over a six-month period.

SKILLS

Cloud Services – Microsoft Azure, Azure DevOps, EC2, S3, Lambda, CloudWatch

AI/ML Operations – Generative AI, Large Language Models (LLMs), MLOps, LLMOps, AI/ML Platforms

Service Management – ServiceNow, Incident Management, Request Management, Problem Management, Root Cause Analysis (RCA)

DevOps & CI/CD – Azure DevOps, Jenkins, Git, Docker, Kubernetes

Monitoring & Logging – Splunk, Dynatrace, CloudWatch Logs, Application Logging, Diagnostics

Scripting & Automation – Python, Shell Scripting

PROJECTS

Generative AI Platform Observability Dashboard

- Developed a comprehensive observability dashboard using **Splunk** to aggregate logs and metrics from the enterprise Generative AI platform and its supporting **Azure cloud infrastructure**.
- Implemented real-time alerting for critical platform health indicators, reducing mean time to detection (MTTD) for P1 incidents by **30%**.
- Created detailed operational runbooks and troubleshooting guides based on dashboard insights, standardizing incident response procedures for the support team.

Automated Deployment Pipeline for AI Applications

- Engineered an automated CI/CD pipeline using **Azure DevOps** and **Docker** to streamline the deployment of AI applications onto the Generative AI platform.
- Integrated infrastructure provisioning scripts (using basic Terraform concepts within Azure) to ensure consistent and repeatable environment setup for application releases.
- Collaborated with application development teams to validate new feature deployments, ensuring smooth productionisation and adherence to operational readiness checklists.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
