HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed responsive, high-performance web interfaces for trading and analytics applications using **React** and **TypeScript**, integrating with real-time data flows.
- Designed and implemented reusable front-end components with **React**, enhancing maintainability and accelerating new feature development by approximately **30%**.
- Built and integrated scalable backend services and **REST APIs** using **Java Spring Boot**, supporting complex trading functionalities and data-driven analytics.
- Contributed to application architecture and technical design discussions, focusing on principles of performance, usability, and reliability for real-time systems.
- Collaborated with traders, quantitative teams, and operations to translate complex financial market requirements into intuitive and functional product features.
- Wrote clean, well-tested, and production-ready code, participating in code reviews and adhering to agile development practices to ensure high-quality deliverables.
- Containerized backend services using **Docker** and deployed them to an **AWS** environment, ensuring efficient resource utilization and streamlined deployment pipelines.

SKILLS

Frontend – HTML, CSS, JavaScript, TypeScript, React, Node.js, WebSockets

Backend – Java, Spring Boot, REST APIs, Microservices, Python

Databases – MySQL, PostgreSQL, SQL

Development Tools – Git, Jenkins, Docker, Jira, Confluence

Financial Markets – Trading Applications, Real-time Systems, Market Data, Financial Analytics

Cloud – AWS

PROJECTS

Real-Time Trading Dashboard (HCL Technologies)

- Developed a **React**-based trading dashboard providing real-time market data visualization for enterprise clients, improving data accessibility for operations teams.
- Integrated **REST APIs** and simulated **WebSocket** connections to ingest and display high-frequency financial data, ensuring low-latency updates.
- Implemented interactive charting components and filtering mechanisms, enabling traders to analyze performance metrics more effectively.

Java Backend Service for Analytics (HCL Technologies)

- Engineered a **Java Spring Boot** microservice to process and aggregate large volumes of financial transaction data for analytical reporting.
- Designed and implemented the persistence layer using **JPA** and **PostgreSQL**, managing data integrity for over 1.5 million transaction records.
- Developed RESTful endpoints for data retrieval, supporting downstream reporting tools and adhering to strict API contract requirements.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
