HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented responsive, scalable front-end applications using **HTML**, **CSS**, **JavaScript**, and **TypeScript**, focusing on user experience for trading platforms.
- Developed reusable **React** UI components and features, contributing to a library that improved development speed for new application modules by **18%**.
- Integrated front-end applications with backend services and APIs, including designing and consuming **REST** and **WebSocket** interfaces for real-time data feeds.
- Contributed to API design and application architecture decisions, collaborating with product owners and trading stakeholders to define technical specifications.
- Wrote clean, well-tested code and participated in code reviews, upholding engineering best practices within an Agile/Scrum team environment.
- Collaborated with traders and product managers to understand complex trading workflows and translate requirements into practical, reliable software solutions.
- Containerized front-end applications using **Docker** and deployed them to **AWS** infrastructure, managing build pipelines with **Jenkins** for efficient CI/CD.

SKILLS

Frontend – HTML, CSS, JavaScript, TypeScript, React, Node.js, WebSocket

Backend – REST APIs, Java Spring Boot, Python, Microservices

Databases – PostgreSQL, MySQL, Oracle, Relational Databases

Cloud & CI/CD – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, SQL

Financial Domain – Trading Workflows, Market Data, Financial Products

PROJECTS

Real-Time Trading Dashboard with React and WebSockets

- Developed a high-performance, real-time trading dashboard using **React**, consuming live market data via **WebSocket** connections.
- Implemented custom UI components and data visualization features to present complex financial data in an intuitive format for traders.
- Integrated with backend services built in **Node.js** to manage user preferences and display aggregated trading metrics, supporting **~500** concurrent connections.

API Integration Layer for Financial Market Data

- Engineered a robust integration layer using **Python** and **FastAPI** to connect to multiple third-party financial data providers via their **REST APIs**.
- Processed and normalized disparate data formats from various sources into a standardized structure, reducing data ingestion complexity by **30%**.
- Managed asynchronous data fetching and error handling to ensure high availability of market data for downstream consumption by internal applications.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
