PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Performed planned preventative maintenance (PPM) on production, packing, and site equipment, including **conveyors**, **gearboxes**, and **motors**.
- Responded to mechanical and electrical breakdowns, diagnosing faults and repairing machinery to minimize production downtime, including **weighing** and **packing machines**.
- Maintained accurate maintenance records, breakdown reports, and work orders, ensuring compliance with site procedures for **food safety** and **hygiene**.
- Supported the installation and commissioning of new machinery, including **bagging** and **sorting equipment**, ensuring proper integration and functionality.
- Carried out routine inspections of machinery, identifying potential failures and implementing proactive solutions to improve equipment reliability and reduce unplanned downtime.
- Maintained and troubleshot **pneumatic** and **hydraulic systems**, identifying and rectifying faults to ensure operational efficiency.
- Assisted with electrical fault-finding and repairs on control panels and associated equipment, adhering to **lock-out/tag-out** procedures and safety protocols.

SKILLS

Maintenance Engineering – Planned Preventative Maintenance (PPM), Reactive Maintenance, Fault Finding, Repair, Mechanical Maintenance, Electrical Maintenance, Welding, Fabrication, Pneumatic Systems, Hydraulic Systems.

Production Equipment – Conveyors, Rollers, Gearboxes, Motors, Pumps, Bearings, Chains, Belts, Bagging Machines, Weighing Systems, Sealing Equipment, Grading Machinery, Sorting Equipment, Palletising Equipment.

Site Services – Compressors, Extraction Systems, Water Systems.

Food Safety & Hygiene – HACCP, Food Safety Procedures, Hygiene Standards, Contamination Risk Reporting, Traceability.

Health & Safety – PPE, Lock-out/Tag-out, Guarding, Emergency Stops, Hazard Reporting, Safe Systems of Work.

Tools & Software – Jira, Confluence, Git, Jenkins, Splunk, Dynatrace, CloudWatch, Linux Shell Scripting.

PROJECTS

Automated Production Line Maintenance System

- Developed a **Python**-based system to track maintenance schedules for critical production machinery, including **conveyors** and **motors**, improving adherence to PPM targets by **18%**.
- Integrated the system with **Jira** for automated ticket generation upon detecting potential equipment failures, streamlining the work order process for the engineering team.
- Designed a user interface using **Flask** for maintenance technicians to log repair details and component replacements, enhancing data accuracy for future analysis.

Hydraulic System Diagnostic Tool

- Created a diagnostic tool in **Python** to analyze sensor data logs from **hydraulic systems**, identifying common fault patterns related to pressure and flow rates.
- Implemented statistical analysis to detect anomalies, reducing the time taken to diagnose complex hydraulic failures by approximately **30%**.
- Built a reporting module that generated summaries of system health and recommended preventative actions for operators and maintenance staff.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
