PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Led end-to-end engineering projects from concept through production, ensuring technical excellence and on-time delivery for new product introductions at a medical technology company.
- Drove new product introduction (NPI) activities, supporting equipment installation, validation, and ramp-up into manufacturing environments.
- Developed and optimized manufacturing processes and equipment to achieve high efficiency and quality standards, performing continuous improvement initiatives.
- Coordinated closely with cross-functional teams including R&D;, Manufacturing, and Quality to ensure seamless project execution and product compliance.
- Identified, analyzed, and resolved complex technical and process challenges using structured problem-solving methodologies and data-driven decision-making.
- Created and maintained comprehensive project documentation, including schedules, risk assessments, and technical reports for engineering projects.
- Monitored project performance using key metrics, proactively managing risks and resource constraints throughout the project lifecycle.

SKILLS

Engineering & Project Management – Project Engineering, New Product Introduction (NPI), Process Optimization, Equipment Installation, Calibration, Validation, Risk Assessment, Technical Documentation, Cross-functional Collaboration, Problem-Solving, Data-Driven Decision-Making

Software & Tools – CAD Software, SolidWorks, AutoCAD, Jira, Confluence, Git, Jenkins

Programming & Scripting – Python, Java, SQL

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, R / RStudio, pandas, NumPy, scikit-learn

Domain Knowledge – Medical Technology, Manufacturing Processes, Enterprise Systems Support, Financial Services Operations Dashboard

PROJECTS

Medical Device Manufacturing Process Optimization

- Engineered a new automated calibration process for a critical medical device component, reducing calibration time by **35%** and improving consistency.
- Developed Python scripts to analyze sensor data from manufacturing equipment, identifying root causes for intermittent quality deviations and reducing defect rates by **18%**.
- Collaborated with the Quality Assurance team to document and validate the revised manufacturing procedures, ensuring compliance with regulatory standards.

Enterprise Resource Planning (ERP) Integration Support

- Supported integration efforts between a core manufacturing execution system (MES) and an enterprise resource planning (ERP) platform, facilitating data flow for production planning.
- Developed automated SQL scripts for data validation and reconciliation between disparate systems, catching approximately **450** data discrepancies per quarter.
- Participated in change control management for system configuration updates, coordinating user acceptance testing (UAT) and post-go-live support across interconnected business systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
