PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed end-to-end project lifecycles for new product introductions at HCL Technologies, ensuring adherence to timelines and quality standards.
- Developed and optimized manufacturing processes for enterprise systems, enhancing efficiency and cost-effectiveness through iterative improvements.
- Coordinated with cross-functional R&D;, Quality, and Manufacturing teams to ensure seamless execution of engineering projects and NPI activities.
- Applied structured problem-solving methodologies to identify, analyze, and resolve complex technical and process challenges in production environments.
- Created and maintained comprehensive project documentation, including risk assessments and technical reports for engineering initiatives.
- Monitored project performance using key metrics, proactively managing risks and resource constraints to ensure successful delivery.
- Containerized enterprise applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing manual intervention.

SKILLS

Project Engineering – New Product Introduction (NPI), Process Optimization, Equipment Installation, Calibration, Validation, Risk Assessment, Project Documentation, Technical Reports

Software Development – Java, Spring Boot, REST APIs, SQL, PostgreSQL, MySQL, Oracle, Python scripting, Git

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, CI/CD

Monitoring & Support – Splunk, Dynatrace, Incident Response, SLA Management

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy

Project Management – Agile, Scrum, Jira, Confluence, Change Management

PROJECTS

Manufacturing Process Enhancement for Enterprise Software

- Engineered and optimized a Python-based data pipeline for ETL processes, reducing data processing time by **30%** for operational reporting.
- Developed REST APIs using **Java Spring Boot** to integrate an internal feature store with downstream enterprise systems, handling approximately **1,500 requests per hour**.
- Authored detailed technical documentation and runbooks for the new processes, facilitating smoother knowledge transfer to operations teams.

Automated Production Monitoring and Alerting System

- Built a Java application that integrated with **Splunk** and **Dynatrace** to monitor production environments, reducing P1 incident response time by **18%**.
- Implemented automated Python scripts for data validation and scheduled reporting, supporting a team of 5 engineers in daily operations.
- Designed and deployed the monitoring service on **AWS Lambda**, ensuring scalability and reliability for high-volume transaction data streams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
