HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **Python** scripts to automate data extraction and transformation for a large-scale financial operations dashboard, reducing manual processing time by approximately **15%** per week.
- Developed and maintained **Java Spring Boot** REST APIs for critical backend services, ensuring seamless integration with upstream and downstream enterprise systems.
- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, contributing to a **10%** improvement in incident resolution time for P1/P2 issues.
- Designed and implemented **Kubernetes** deployments for containerized microservices, including cluster configuration and basic resource management on **AWS**.
- Built and optimized **SQL** queries across **PostgreSQL** and **MySQL** databases for complex data retrieval and validation tasks, supporting critical reporting functions.
- Collaborated with system development teams to iterate on software platforms, constructing automated operation solutions for large-scale systems.
- Contributed to the design and implementation of new data protection plans to meet standard requirements for enterprise infrastructure.

SKILLS

Languages – Python, Java, SQL

Frameworks – Spring Boot, Flask, FastAPI

Cloud & Infra – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

Databases – PostgreSQL, MySQL, Oracle, Redis, MongoDB, MQ

Tools & Platforms – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Kafka, Spark, Flink, RPC Framework, Service Mesh

Data & Analytics – pandas, NumPy, scikit-learn, Power BI, Tableau, DAX, Power Query

PROJECTS

Automated Data Pipeline for Infrastructure Monitoring

- Developed a **Python**-based data pipeline to ingest and process logs from various infrastructure components, feeding into a centralized monitoring system.
- Implemented efficient data parsing and transformation logic using **pandas** and **NumPy**, enabling faster analysis of system performance metrics and error patterns.
- Containerized the pipeline using **Docker** and deployed it to an **AWS** environment, ensuring reliable and scalable operation for continuous data ingestion.

Scalable Storage System Health Dashboard

- Designed and built a **Power BI** dashboard to visualize the health and performance metrics of distributed storage systems, aggregating data from multiple sources.
- Wrote complex **DAX** measures and utilized **Power Query** for data transformation, providing key insights into storage capacity, IOPS, and network latency for operations teams.
- Integrated with **SQL** databases (**PostgreSQL**) to retrieve historical performance data, enabling trend analysis and proactive capacity planning for enterprise storage.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
