PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and coded functional proof-of-concepts for **emerging technologies**, evaluating performance and suitability before company-wide adoption, enabling faster decision-making for technical leadership.
- Developed **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to ensure system resilience.
- Designed and implemented **Hibernate** entities and mappings for a core data persistence layer, optimizing query performance and ensuring data integrity across multiple relational databases.
- Containerized distributed systems using **Docker** and deployed to **Kubernetes** clusters (EKS), configuring Helm charts and resource limits for predictable rollouts and efficient scaling.
- Collaborated with senior engineers and architects on short-cycle strategic initiatives, rapidly prototyping solutions and de-risking complex technical challenges across the full stack.
- Authored technical summaries and hand-off documentation for validated architectures, ensuring clean, maintainable deliverables transitioned to core product teams for ongoing development.
- Analyzed and resolved critical production incidents (P1/P2) for enterprise applications, managing SLAs and performing root cause analysis using **Splunk** and **Dynatrace** to maintain system stability.

SKILLS

Languages – Java, Python, C#, TypeScript, C++

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Backend Technologies – Spring Boot, Hibernate, JPA, REST APIs, Microservices, FastAPI, Flask

Containerization & Orchestration – Docker, Kubernetes (EKS)

Databases – PostgreSQL, MySQL, Oracle, SQL

DevOps & CI/CD – Jenkins, Git, Code Reviews

Observability – Splunk, Dynatrace, CloudWatch

PROJECTS

Cloud-Native Performance Profiling Tool (HCL Technologies)

- Developed a **Python**-based tool to profile application performance on **AWS EC2** instances, identifying bottlenecks and reducing average request latency by **30%**.
- Integrated **Docker** containerization for the profiling service, enabling consistent deployment across development and staging environments.
- Designed a REST API using **FastAPI** to expose profiling results, allowing integration with existing monitoring dashboards.

Enterprise System Integration Spike (HCL Technologies)

- Engineered a **Java Spring Boot** application to integrate disparate enterprise systems via REST APIs, facilitating data synchronization between a legacy ERP and a new CRM.
- Implemented robust error handling and retry mechanisms using **JPA** and PostgreSQL, ensuring transactional integrity during data transfer operations.
- Collaborated with business analysts to gather requirements and conduct UAT, confirming the integration met operational needs for approximately **50 users**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
