PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained a production **web platform** for technical documentation, integrating **JavaScript/TypeScript**, **HTML**, and **CSS** to create user-facing experiences.
- Designed and implemented **REST API integrations** for cloud-hosted services, enabling modern search and AI-powered features within the documentation platform.
- Automated build, validation, and publishing processes using **Azure DevOps pipelines**, significantly improving the efficiency of documentation delivery.
- Wrote and maintained automation scripts in **Python** to support platform operations and content management workflows, reducing manual effort by approximately **30%**.
- Debugged and resolved complex issues spanning **frontend applications**, **APIs**, and **backend services**, ensuring platform stability and performance.
- Collaborated with product and release teams to integrate documentation workflows into the broader **build and release cycles**, enhancing content consistency.
- Containerized platform services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring reliable operation.

SKILLS

Frontend – JavaScript, TypeScript, HTML, CSS, React

Backend – Python, Java, Spring Boot, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Azure DevOps, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools & Other – REST APIs, Jira, Confluence, Linux, PowerShell, Splunk, Dynatrace

PROJECTS

Documentation Platform Enhancement (HCL Technologies)

- Developed new interactive components for a customer-facing documentation portal using **React** and **TypeScript**, enhancing user engagement and information discoverability.
- Integrated a new search indexing service via **REST APIs**, improving search result relevance and reducing average query times by **18%**.
- Automated the deployment of platform updates to **AWS** using **Jenkins** pipelines, ensuring consistent and reliable releases.

Technical Content Automation Framework (HCL Technologies)

- Created a **Python**-based framework to automate the generation of static documentation pages from various source files, processing over **500** documents weekly.
- Implemented CI/CD integration using **Git** and **Jenkins** to automatically build and deploy updated documentation upon code merges.
- Wrote scripts to perform automated data validation checks on content metadata, catching approximately **60%** of common errors before publication.
