HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed and troubleshot enterprise **Linux and Windows servers**, including virtualization platforms, network services, and backup systems, ensuring 24/7 operational uptime for critical manufacturing infrastructure.
- Acted as a key escalation point for complex infrastructure incidents within a regulated manufacturing environment, leading root cause investigations and implementing permanent solutions.
- Administered and maintained **LAN/WAN infrastructure**, including managed switches and routers across the manufacturing control network, configuring Layer 2/Layer 3 networking like VLANs and inter-VLAN routing.
- Implemented infrastructure changes in compliance with strict change management, cybersecurity, and GxP requirements, supporting technology refreshes and lifecycle management activities.
- Performed packet-level analysis using **Wireshark** to diagnose latency and packet loss issues, ensuring reliable connectivity and performance for manufacturing and business-critical systems.
- Configured and tuned network monitoring tools (e.g., **SNMP, syslog**) and alerting thresholds, contributing to capacity trending and proactive issue identification.
- Maintained technical documentation, operational procedures, and support records, contributing to audit readiness through adherence to validation and compliance requirements.

SKILLS

Operating Systems – Windows Server, Linux

Networking – LAN/WAN, VLANs, OSPF, Spanning Tree, Link Aggregation, Firewalls, Network Segmentation

Monitoring & Analysis – Wireshark, NetFlow, sFlow, SNMP, Syslog, SolarWinds, PRTG, Zabbix

Infrastructure & Virtualization – Virtualization Platforms, Managed Switches, Routers, Wireless Access Points, Backup Systems

Compliance & Security – GxP, Cybersecurity Standards, IEC 62443, NIST, Vulnerability Management, Patch Management

Protocols & Services – Active Directory, TCP/IP, VPN, Citrix, MFA

PROJECTS

Manufacturing Control Network Resilience Upgrade

- Engineered and implemented network segmentation changes, including firewall rule reviews and updates, to enhance security between CORP, MCN, and DMZ zones.
- Designed and deployed redundant network paths and failover testing for critical manufacturing systems, improving overall infrastructure resilience and maintainability.
- Updated network configuration baselines, backups, and version control for network devices, ensuring compliance with documented change and validation processes.

Infrastructure Monitoring and Alerting Enhancement

- Integrated new network devices into existing monitoring solutions such as **SolarWinds and PRTG**, configuring SNMP and syslog for real-time health and performance tracking.
- Tuned alerting thresholds across the manufacturing environment, reducing false positives by approximately **18%** and improving incident response times for critical alerts.
- Developed comprehensive technical documentation and operational procedures for the enhanced monitoring system, supporting audit readiness and team knowledge transfer.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
