PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Terraform** modules to provision and manage cloud infrastructure across **AWS** and **GCP**, creating a single source of truth for environment configuration.
- Automated network security policy deployment across **GKE** clusters using **Helm** and **ArgoCD**, enforcing strict ingress and egress controls for production workloads.
- Developed **Python** scripts to automate log aggregation and analysis from distributed systems using **Splunk**, reducing manual incident investigation time by approximately 30%.
- Maintained and operated **Kubernetes** clusters (**GKE**), focusing on cluster hardening, network policy implementation, and secure deployment patterns.
- Managed the configuration and evolution of **Cloudflare** for edge security, DNS management, and traffic routing to production services.
- Integrated **Tailscale** across development and production environments to establish a secure, zero-trust network access layer, simplifying secure connectivity for remote teams.
- Participated in an on-call rotation, responding to infrastructure and network incidents, conducting root cause analysis, and implementing durable fixes to improve operational resilience.

SKILLS

Cloud Platforms – AWS, GCP, Azure

Infrastructure as Code – Terraform, Ansible, Helm

Container Orchestration – Kubernetes, GKE, Docker

Networking & Security – Cloudflare, Tailscale, WAF, DNS, API Gateway, Network Policy, Egress Control

Automation & Scripting – Python, Bash, Go

Observability – Grafana, Splunk, CloudWatch

CI/CD & GitOps – GitHub, GitLab, ArgoCD, Jenkins

PROJECTS

Multi-Cloud Infrastructure Hardening

- Developed **Terraform** configurations to provision secure network infrastructure across **AWS** and **GCP**, including VPCs, subnets, and firewall rules.
- Implemented network segmentation strategies and egress control mechanisms using **Ansible** playbooks to enforce outbound traffic policies.
- Containerized core infrastructure tooling with **Docker** and managed deployments to a shared **Kubernetes** cluster, ensuring consistent environments.

Automated Security Policy Deployment

- Engineered **Python** scripts to dynamically generate and apply **Kubernetes** network policies based on service dependencies and security requirements.
- Integrated **ArgoCD** for GitOps-driven deployment of **Helm** charts, automating the rollout of security configurations and infrastructure updates.
- Built dashboards in **Grafana** to visualize network traffic patterns and identify anomalous activity, supporting proactive security monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
