PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Translated complex enterprise problems into executable technical solutions, architecting and shipping agent-based automation workflows within 3-week customer engagements.
- Collaborated directly with client end-users and process owners to elicit detailed workflow requirements, identifying underlying issues beyond initial statements.
- Designed and implemented integrations with legacy enterprise systems, including ERP platforms, via REST APIs and direct database connections to facilitate data flow.
- Owned the end-to-end technical solution for customer deployments, encompassing architecture, data models, agent logic, and deployment strategies.
- Developed reusable components and prompt structures from client engagements, contributing to a knowledge base that accelerated subsequent project delivery timelines by an average of 15%.
- Managed system observability and evaluation post-deployment, iterating on solutions to ensure reliability and performance under real-world customer conditions.
- Containerized and deployed agent services to cloud environments using **Docker** and **Kubernetes**, ensuring efficient resource utilization and scalable operation.

SKILLS

AI / ML Platforms – LLM APIs, Agent Frameworks, Tool Calling, Function Calling, Prompt Engineering, Evals, RAG

Backend Development – TypeScript, Node.js, NestJS, APIs, Authentication, Queues, Legacy System Integration

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, CI/CD, Jenkins, Git

Data & Databases – SQL, PostgreSQL, MySQL, Oracle, Data Modeling, Data Warehousing

Enterprise Systems – ERP Automation, SAP, Microsoft Dynamics, Oracle NetSuite, Business Process Automation

Languages – Python, Java, Spring Boot, SQL, TypeScript

Observability & Support – Splunk, Dynatrace, P1/P2 Incident Response, SLA Management

PROJECTS

Customer Process Automation with Agentic Platform

- Led the technical implementation for three enterprise clients, translating their specific operational challenges into functional automated workflows on the agent platform.
- Designed and integrated custom API connectors to link the platform with client-specific ERP systems, enabling seamless data exchange for automated transaction processing.
- Developed reusable prompt templates and agent logic modules based on common financial operations patterns, reducing the average configuration time for new workflows by 20%.

Automated Reconciliation Workflow for Financial Operations

- Built an automated reconciliation service using **Python** and **FastAPI** to process and compare large datasets from disparate financial systems, handling approximately 5,000 records per minute.
- Implemented robust error handling and logging mechanisms, integrating with **Splunk** for real-time monitoring and alerting on reconciliation discrepancies, reducing manual review effort by 40%.
- Developed a **SQL** data model to store reconciliation results and audit trails, facilitating quick ad-hoc analysis and reporting for operational teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
