HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for core platform features, incorporating **RESTful API** principles and robust error handling.
- Implemented data persistence layers using **Hibernate** and **JPA**, managing complex relational schemas and optimizing query performance for enterprise applications.
- Authored **JUnit** and **Mockito** test suites for critical Java components, achieving over **85% code coverage** and ensuring functional integrity before deployment.
- Collaborated with business stakeholders to gather requirements for automated document processing features, translating complex needs into precise technical specifications.
- Contributed to code reviews, providing constructive feedback and mentoring junior engineers on **Clean Code** and **Clean Architecture** principles to elevate team technical standards.
- Participated in **Agile ceremonies** including sprint planning and daily stand-ups, providing technical estimations and contributing to roadmap discussions for product evolution.
- Containerized services using **Docker** and managed deployments on a **Kubernetes cluster** within a cloud infrastructure (AWS), integrating with **GitHub CI/CD** pipelines for automated builds and releases.

SKILLS

Languages – Golang, Java, Python, SQL

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, FastAPI, Flask

Databases – MySQL, PostgreSQL, Oracle

Cloud & DevOps – Kubernetes, Docker, AWS, GCS, Azure, GitHub CI/CD, Jenkins

Methodologies – Agile, Scrum, Clean Code, Clean Architecture

Tools – Jira, Confluence, Splunk, Dynatrace, Git

PROJECTS

Enterprise Document Processing Automation

- Developed a **Java Spring Boot** application to automate the ingestion and initial classification of business documents, processing approximately **5,000 documents daily**.
- Integrated with a cloud-based optical character recognition (OCR) service via **REST APIs** to extract text data, followed by custom parsing logic in **Java** to structure the output.
- Designed and implemented a **PostgreSQL** schema to store extracted document metadata and processing status, facilitating downstream analytics and workflow management.

Automated Reconciliation Workflow System

- Built a Python-based system to automate reconciliation workflows for financial transactions, capable of processing over **10,000 transaction records per hour**.
- Developed data pipelines using **pandas** and **SQLAlchemy** to extract, transform, and load transaction data from multiple sources into a staging database.
- Engineered a rule-based matching engine in **Python** to identify discrepancies between datasets, flagging exceptions for manual review and reducing manual reconciliation effort by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
