PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented a **Java Spring Boot** REST API for cross-service data exchange, incorporating request validation and circuit-breaker patterns to handle approximately **1,500 requests per minute**.
- Developed and maintained **Python ETL pipelines** to automate data ingestion and transformation for scheduled reporting, processing over **50 GB of daily data**.
- Refactored inefficient relational database queries and implemented strategic indexing on **PostgreSQL**, reducing analytical report execution times by **34%** across core ERP database clusters.
- Collaborated with client engineers and end-users to gather requirements and translate complex business processes into technical solutions, shipping functional prototypes within **two weeks**.
- Owned end-to-end technical delivery for customer engagements, including architecture, integrations, and workflow logic, ensuring reliable system operation in customer environments.
- Integrated agentic platform capabilities with legacy systems, handling API access, data flows, and deployment reviews to earn trust with client engineering teams.
- Containerized microservices using **Docker** and deployed them to a Kubernetes cluster (EKS), configuring basic resource limits for predictable rollout and management.

SKILLS

AI/ML – LLM APIs, tool and function calling, agent frameworks, evals, prompt engineering, TypeScript, Node.js, NestJS

Backend Development – Java, Spring Boot, REST APIs, Python, FastAPI, Flask, Microservices, Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, SQL, Data Model, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git, CI/CD

Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Enterprise Systems – ERP integration, business process automation, change management

PROJECTS

Customer Engagement Automation Platform

- Designed and shipped a **Java Spring Boot** microservice to manage customer onboarding workflows, integrating with internal CRM and notification systems.
- Developed a **Python CLI tool** to validate customer-provided configuration files against platform schemas, catching over **60%** of common errors before submission.
- Collaborated with a pilot enterprise customer to integrate the platform's core agent logic into their existing operational dashboards, demonstrating early results and gathering feedback for iterative improvements.

Automated Transaction Reconciliation System

- Built a **Python**-based system to automate the reconciliation of financial transaction data between two enterprise systems, reducing manual effort by an estimated **40 hours per cycle**.
- Implemented robust error handling and logging using **FastAPI** and **PostgreSQL**, ensuring data integrity and providing detailed audit trails for all processed transactions.
- Developed real-time monitoring dashboards in **Power BI** to visualize reconciliation status and highlight discrepancies, enabling operations teams to quickly identify and resolve issues.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
