PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and executed a territory plan to identify and engage **strategic enterprise accounts**, mapping key stakeholders including CFO and CIO leadership.
- Practiced insight-led selling by reframing customer challenges in areas like **operational bottlenecks** and **decision friction**, translating them into target-state narratives.
- Managed complex, multi-stakeholder enterprise sales cycles, building consensus across buying committees and quantifying value through **capacity release** and **cycle time reduction**.
- Partnered closely with Solutions Engineering to conduct workshops and demos, addressing **technical concerns** and de-risking integration for enterprise rollouts.
- Quantified and communicated business value, including **control/compliance improvements** and **stack simplification**, aligning proposals with executive priorities and budget.
- Orchestrated deal progression, managing the business case, pricing strategy, negotiation, and contracting phases to drive commercial outcomes.
- Containerized core platform services using **Docker** and deployed them to a managed **Kubernetes** cluster, enabling predictable rolling updates and resource management.

Financial & Operations Domain – Finance Transformations, Procurement Transformations, Shared Services, Core Business Processes

Presales & Delivery Alignment – Solutions Engineering, Customer Success, Implementation Planning, Technical De-risking, Security & Integration Assessment

PROJECTS

Enterprise Platform Adoption Strategy

- Developed a multi-quarter strategic account plan for engaging **Fortune 500 clients** in the financial services sector, identifying key decision-makers and potential automation opportunities.
- Designed and presented value-based proposals to C-level executives, quantifying potential productivity gains of **5-10x** through end-to-end process automation.
- Collaborated with internal Solutions Engineering to map customer workflows to the platform's capabilities, addressing **integration challenges** and security requirements.

Autonomous Operations Framework Development

- Modeled business process automation scenarios, focusing on **exception handling** and **control improvements**, to demonstrate end-to-end process optimization.
- Built reusable technical demonstration components using **Java Spring Boot** and sample data to showcase platform capabilities for core finance and operations functions.
- Authored technical documentation and best practice guides for enabling autonomous operations in complex enterprise environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021
