PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed shift operations for electricity generating assets, optimising availability and efficiency while adhering to safety and environmental standards.
- Acted as the 'Authorised' person under the Permit to Work System, ensuring process safety and a secure environment for all maintenance activities.
- Performed proactive process fault diagnosis and reported findings through the maintenance management system, contributing to problem-solving initiatives.
- Coordinated safety precautions and managed site access/egress, serving as the first line of response for emergency situations.
- Liaised with stakeholders, including owners, authorities, suppliers, and contractors, on maintenance outages and reliability of supply.
- Participated in the Performance Management process, ensuring delivery of own and team objectives through proactive engagement.
- Containerised Java Spring Boot services with **Docker** and deployed to **AWS EC2** instances, managing configurations via **Jenkins** pipelines for continuous integration.

SKILLS

Operations & Monitoring – Thermal generating assets, Availability optimisation, Process efficiency, Environmental compliance, Ancillary services revenue, Plant status updates, Grid system operator

Safety & Compliance – Permit to Work System, Process safety management, High voltage safety training (Telemess), Site security, Emergency response, Health and Safety regulations

Systems & Tools – Maintenance management systems, Computerised permit system, Business Management System, IT skills

Engineering & Maintenance – Electrical systems, Mechanical systems, Automation systems, Power Plant operations, Heavy industry plant, Fault diagnosis, Maintenance activities, Outage support

Soft Skills – Shift team leadership, Human resource development, Problem solving, Initiative, Stakeholder liaison, Performance management, Communication, Reliability of supply

PROJECTS

Production Asset Monitoring and Control System

- Developed a **Java Spring Boot** application to ingest real-time operational data from generating assets, enabling proactive monitoring and optimisation.
- Integrated with **Splunk** for log analysis and anomaly detection, reducing manual log review effort by **40%** for incident triage.
- Implemented RESTful APIs for status updates and reporting to the grid system operator, ensuring compliance with operational requirements.

Automated Maintenance Workflow System

- Designed and implemented a **Python**-based system to automate permit-to-work request processing and approval workflows, reducing turnaround time by **30%**.
- Developed data validation scripts using **pandas** to ensure accuracy of asset information before integration into the maintenance management system.
- Built reporting dashboards using **Power BI** to track key operational metrics and maintenance task completion rates for management review.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
