HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Architected and implemented **Java Spring Boot** microservices for core backend functionalities, focusing on RESTful API design and inter-service communication patterns.
- Developed and maintained **Hibernate** entities and mappings for complex relational data models, ensuring data integrity and efficient persistence layer operations across multiple database schemas.
- Authored **JUnit** and **Mockito** tests for critical Java components, achieving **85% code coverage** and significantly reducing regressions in production releases.
- Designed and implemented automated operational solutions using **Python** scripting to manage and monitor large-scale cloud infrastructure, reducing manual intervention by **40%**.
- Managed system high availability and performed bottleneck analysis on production systems, contributing to a **15% improvement** in overall system stability.
- Developed software platforms and monitoring frameworks for efficient, automated, and intelligent service-oriented architecture (SOA) governance, enhancing system observability.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, establishing CI/CD pipelines with **Jenkins** for automated build and deployment.

SKILLS

Languages – Python, Java, SQL, Bash

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Databases – PostgreSQL, MySQL, Oracle, Redis, MongoDB, Kafka

Operating Systems – Linux

Methodologies – Agile, Scrum, SRE

PROJECTS

Scalable Java Microservices for Cloud Infrastructure

- Developed a suite of **Java Spring Boot** microservices to manage cloud resource provisioning and monitoring, integrating with AWS APIs.
- Implemented **Hibernate** for persistence, storing configuration data and operational metrics in a **PostgreSQL** database.
- Designed and deployed services using **Docker** on an **AWS EC2** cluster managed via **Jenkins** CI/CD pipelines, enabling rapid iteration.

Automated Storage Fleet Management Platform

- Built a **Python**-based platform for automating the deployment and health checks of storage nodes, interacting with underlying Linux systems.
- Integrated with **Redis** for caching node status and configuration, and used **Kafka** for asynchronous event processing from storage devices.
- Developed monitoring dashboards using internal tooling that visualized storage capacity and performance metrics, aiding capacity planning.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
