HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered **Java Spring Boot** microservices to expose core business logic via REST APIs, integrating with existing enterprise systems and supporting ~500 concurrent requests per endpoint.
- Developed and maintained **Hibernate** entities and complex SQL queries for data persistence and retrieval across PostgreSQL and Oracle databases, ensuring data integrity for critical financial operations.
- Designed and implemented asynchronous processing patterns using message queues (e.g., Kafka, RabbitMQ) within **Java EE** applications, enhancing system resilience and enabling event-driven architectures.
- Automated release management processes for the **Camunda 8** codebases, integrating AI-assisted steps for dependency updates and CVE remediation, reducing manual effort by approximately 40%.
- Collaborated with infrastructure teams to optimize **CI/CD pipelines** for GitHub Actions and Maven, improving build times by 15% and increasing deployment frequency for core engineering services.
- Spearheaded the implementation of an autonomous dependency update system, utilizing **Python scripting** and automated testing to manage over 200 internal libraries across multiple monorepositories.
- Containerized backend services using **Docker** and orchestrated deployments on **AWS EC2** instances, configuring basic resource limits and monitoring within a Jenkins CI/CD framework.

SKILLS

Languages – Java, Python, SQL, Shell Scripting

Frameworks & Libraries – Spring Boot, Hibernate, Java EE, Spring Cloud, FastAPI, Flask, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, GitHub Actions

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Maven, Gradle, Camunda 8

Concepts – REST APIs, Microservices, CI/CD, Agile/Scrum, Incident Response, Dependency Management, AI-Augmented Engineering, Observability

PROJECTS

Automated CI/CD for Enterprise Java Services

- Developed a comprehensive CI/CD pipeline using **Jenkins** and **Git** for a suite of Java Spring Boot microservices, automating build, test, and deployment stages.
- Integrated automated static code analysis and unit testing (JUnit, Mockito) into the pipeline, improving code quality and catching over 85% of common defects before production deployment.
- Implemented canary deployments and rollback strategies for critical Java services, reducing the risk associated with new releases and ensuring high availability for end-users.

Python-based Data Pipeline for Operational Insights

- Engineered a **Python** ETL pipeline to process and aggregate operational data from multiple sources (PostgreSQL, flat files) into a centralized data mart.
- Developed automated reporting scripts using **pandas** to generate daily and weekly performance summaries for system operations teams, highlighting key metrics and anomalies.
- Deployed the pipeline on **AWS Lambda**, triggered by S3 events, processing approximately 1.5 GB of data daily and providing timely insights for incident triage.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
