HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and enhanced Python libraries and tooling to maintain **Data Science platforms**, ensuring systems remained reliable and efficient for internal teams.
- Collaborated with **data scientists** and business teams to understand challenges and develop practical technical solutions for revenue optimisation initiatives.
- Supported the development and deployment of **machine learning solutions**, contributing to automated delivery pipelines, testing, and performance improvements.
- Wrote clean, maintainable Python code and participated in **code reviews**, applying engineering best practices to enhance software quality.
- Explored new ideas and technologies, contributing to **proof-of-concept projects** focused on data-driven revenue strategies.
- Maintained and enhanced existing **Python libraries** and services, ensuring scalability and performance for core data science functionalities.
- Containerized Python applications using **Docker** and deployed them to **AWS** environments, integrating with CI/CD pipelines for streamlined delivery.

SKILLS

Languages – Python, SQL, Java, R

Cloud & Containerization – AWS, Docker, Kubernetes

Machine Learning & Data Science – scikit-learn, pandas, NumPy, data modelling, statistical analysis

Development Practices – Git, CI/CD, Jenkins, code reviews, automated testing

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

Machine Learning for Revenue Optimisation Platform

- Engineered Python feature pipelines to extract behavioural signals from transaction data, processing approximately 1.5 million records for downstream model training.
- Trained a **LightGBM classifier** on extracted features to predict customer booking propensity, achieving an **AUC of 0.79** on a held-out dataset.
- Packaged the trained model into a **FastAPI** service, enabling real-time inference for customer-facing applications with p95 latency under 200ms.

Data Engineering for Financial Services Dashboard

- Developed Python scripts to automate ETL processes for the **payments operations dashboard**, integrating data from PostgreSQL and Oracle databases.
- Designed and implemented scheduled reporting jobs using Python and SQL to provide operational insights on transaction flows and system health to business analysts.
- Collaborated with cross-functional operations teams to gather requirements for new dashboard features, ensuring alignment with business needs for transaction monitoring.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
