PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed large, complex datasets using **SQL** to identify trends and uncover commercial opportunities, improving pricing performance for car rental and insurance products.
- Developed and optimized pricing strategies for car rental and insurance products, delivering data-driven recommendations that maximized revenue and profitability.
- Built insightful **Tableau** and **Power BI** dashboards to monitor performance, track key metrics, and support data-informed business decisions.
- Translated complex analysis into practical solutions, collaborating with Revenue, Supply, and Trading teams to implement improvements that delivered measurable commercial results.
- Analyzed market trends, competitor pricing, and customer demand to identify new opportunities, enhance forecasting accuracy, and support effective pricing decisions.
- Collaborated with **Data Science** and **Engineering** teams to enhance pricing models and test new analytical approaches, turning insights into scalable solutions.
- Managed production support for enterprise applications, including incident response for P1/P2 issues and SLA management using tools like **Splunk** and **Dynatrace**.

SKILLS

Data Analysis & BI – SQL, Tableau, Power BI, DAX, Power Query, Data Modelling, Statistical Analysis, R, Python (pandas, NumPy)

Pricing & Strategy – Pricing Strategy Development, Revenue Optimization, Market Trend Analysis, Competitor Analysis, Forecasting

Programming & Scripting – Python, Java, Spring Boot, REST APIs, SQL Scripting

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Enterprise Systems – ERP Integration Support, Change Management, Jira, Confluence

PROJECTS

Car Rental Pricing Optimization Engine

- Developed a Python-based analysis framework to process large datasets of historical booking data and competitor pricing information, identifying key drivers of demand elasticity.
- Built interactive **Tableau** dashboards to visualize pricing performance, demand forecasts, and competitor price movements, enabling the Revenue team to make faster, more informed decisions.
- Implemented SQL queries across multiple databases to extract and aggregate data for pricing model inputs, improving data accuracy by approximately 15%.

Insurance Product Demand Forecasting Dashboard

- Designed and deployed a **Power BI** dashboard aggregating insurance product sales data, marketing campaign performance, and external market indicators.
- Created complex **DAX** measures to calculate key performance indicators such as customer acquisition cost, lifetime value, and churn rate for different insurance segments.
- Collaborated with business stakeholders to define reporting requirements and gather feedback, ensuring the dashboard effectively supported strategic planning and operational adjustments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
