HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained new features for a core collaboration platform using **C++**, adhering to strict coding standards and contributing to sprint planning.
- Integrated third-party meeting platform software into the existing stack, ensuring seamless data exchange and functionality through rigorous testing.
- Wrote **Python** scripts to automate build processes and generate test reports, reducing manual effort by approximately **40%**.
- Participated in code reviews, providing constructive feedback to junior engineers and ensuring adherence to best practices in **C++** and **Python** development.
- Collaborated with cross-functional teams to troubleshoot and resolve complex bugs in the Linux environment, improving system stability.
- Designed and implemented automated test suites for new features, increasing test coverage by **30%** and identifying critical defects pre-release.
- Containerized application components using **Docker** and orchestrated deployments on **AWS EC2** instances, enhancing deployment consistency and scalability.

SKILLS

Languages – C++, Python, SQL, Java

Operating Systems – Linux, Windows

Cloud Platforms – AWS (EC2, S3, CloudWatch)

Development Tools – Git, Jenkins, Jira, Confluence, Docker, CMake

Methodologies – Agile, Scrum

Embedded Systems – Low-level programming, Embedded platforms

Testing – Automated testing, Test suites, Debugging

PROJECTS

Linux Kernel Module for Device Driver

- Developed a custom Linux kernel module in **C++** to interface with a new hardware peripheral, managing low-level data transfer.
- Implemented robust error handling and logging mechanisms within the kernel module to aid in debugging complex system interactions.
- Conducted extensive unit and integration testing on the module under various load conditions using custom testing frameworks.

Automated Build and Test Framework

- Engineered a **Python**-based framework to automate the build, test, and packaging of software releases for a distributed system.
- Integrated **Jenkins** pipelines to trigger the framework, providing automated build artifacts and test reports on code commits.
- Reduced the manual build and deployment cycle time by **50%**, enabling faster iteration cycles for the engineering team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
